Report on Exhibition and Sale of Hygiene Products

Organized by: Department of Chemistry & Eureka Club

Venue: Auditorium, Sacred Heart College, Chalakudy

Date: 29th September 2023

The Department of Chemistry, in association with the Eureka Club, successfully organized an exhibition and sale of hygiene products on 29th September 2023, coinciding with the Parent-Teacher Association (PTA) meeting at Sacred Heart College, Chalakudy. The event aimed to raise awareness about personal hygiene and provide access to quality hygiene products for the college community.

The exhibition was inaugurated by Advocate Fijo Joseph, who emphasized the importance of maintaining hygiene for health and well-being, particularly in the context of college life. The sale featured a wide range of hygiene products, including hand sanitizers, soaps, disinfectants, personal care items, and other essential products designed to promote cleanliness and hygiene.

The event was well-received by students, faculty members, and parents, who appreciated the initiative taken by the Department of Chemistry and Eureka Club. It provided an opportunity for the college community to purchase hygiene products at reasonable prices while also learning about their significance in daily life. Additionally, the event served as an educational platform, highlighting the importance of hygiene in preventing infections and promoting overall health.

This exhibition and sale were an excellent way to combine social awareness with practical solutions, making a meaningful contribution to the college community's well-being. It also showcased the Department of Chemistry's commitment to engaging with real-world issues and promoting public health through knowledge and action.

The exhibition and sale not only focused on promoting hygiene awareness but also provided valuable insights into the chemistry behind the hygiene products on display. Representatives from the Department of Chemistry explained the ingredients and formulations of the products, demonstrating how the chemical composition of soaps, sanitizers, and disinfectants plays a crucial role in maintaining cleanliness and preventing the spread of diseases.

Several informative displays were set up, explaining the science of germs, bacteria, and viruses, as well as the effectiveness of various hygiene products in combating them. The exhibition helped students, parents, and faculty members understand the importance of using the right products to ensure proper hygiene and safety, especially in the context of public health challenges.

In addition to the educational aspect, the event also offered a practical benefit to attendees. Many students, parents, and staff took the opportunity to purchase essential hygiene products at discounted rates, making them more accessible and ensuring that the college community could maintain good hygiene practices with ease.

The sale was accompanied by informative pamphlets and posters, providing tips on personal hygiene, cleaning routines, and the benefits of regular use of sanitizers and disinfectants. These resources served as a valuable guide for the attendees, encouraging them to incorporate hygiene practices into their daily routines.

This successful event not only achieved its goal of raising awareness but also contributed to the overall health and safety of the college community. By combining scientific knowledge with practical action, the Department of Chemistry and Eureka Club showcased their commitment to fostering a healthier, more informed campus environment. The exhibition and sale are expected to become an annual initiative, with future events expanding on the scope of hygiene education and product offerings.
