

LEPROSY AWARENESS RALLY

ORGANISED BY NSS ON 30 JANUARY 2020

Leprosy is a chronic infectious disease caused by *Mycobacterium leprae*, an acid-fast, rod-shaped bacillus. The disease mainly affects the skin, the peripheral nerves, mucosa of the upper respiratory tract, and the eyes. Leprosy is curable and treatment in the early stages can prevent disability.

In association with Chalakudy Government hospital, the NSS Volunteers participated in the Leprosy awareness programme on 30/1/2020 at Chalakudy Town. The event witnessed the volunteers carrying placards bearing slogans breaking the stigma associated with leprosy. It took forward the message, breaking misconceptions concerning the disease. Slogans bearing information such as leprosy is not a hereditary disease were prominent all through the rally. The rally was conducted to raise awareness about medical facilities available to eliminate leprosy from the society. The volunteers also carried placards highlighting the need to maintain clean surroundings and hygienic conditions to prevent leprosy.

The NSS Volunteers actively participated in the Rally at Chalakudy Town.
