

DAIRY ENTREPRENEURSHIP DEVELOPMENT

On 5th March 2019 the students of the department were given training on how to make dairy products for sale. Ms. Usha Devi, Vice Principal of Dairy Training Center gave a talk on how to make dairy products to earn a living. The students wanted to put their newly learned skills to a test and made dairy products from scratch. They were completely involved in the entire process right from buying the raw materials required as well as packaging several dairy products.

An exhibition cum sale of the various dairy products was done during the Vacada Fest – Exhibition cum sale of dairy products, made by the students in the college. Exhibition was inaugurated by Ms. Usha Devi. This activity helped the students to manage funds and plan an activity on their own and helped enhance their entrepreneurial skills.

The students of III DC had undergone a training of making dairy products at the Dairy Training Institute, Alathur. The skills learnt there were put to use and many dairy products were made by the students for exhibition cum sale.

The students divided themselves into teams and planned the items to be made and materials required for the preparation of the products. The event was fruitful after many weeks of planning. Some of the items made by the students – milk pedas, yoghurt, cakes, shakes, rasmalai, rasgulla, gulab jamun etc. All the items that were sold were entirely made by the students from scratch. The III DC students were helped by the II DC and I DC students. As students of Zoology and aware of the adverse effects of plastics the students sold their products in eco-friendly packaging. Earthen pots were used to sell yoghurt, paneer, peda etc., shakes were sold in reusable glasses. Cakes were sold in paper plates or card board boxes.

The II DC and I DC students also conducted an exhibition of charts, models and games related to dairy and animal husbandry. Information regarding cattle breeds, composition of milk, milk adulteration etc. There was also a spinning wheel of questions where the visitors were asked various questions and winners given free treats from the products on sale.

The students of other departments and teachers of the college were the buyers and all were very happy with the products sold by the students and very enthusiastic on knowing how all were made. The event was considered to be a success as all the items prepared were sold and all customers were happy.

Though we had hands-on training at DTC, this being the first time we prepared the products on our own. Though there were several mishaps it was an excellent learning experience for us as students. This also helped learn the way to manage money as we had to balance out our expenses and profits.
