

## **CONNECTING PEOPLE WITH NATURE – ORGANISED BY: DEPARTMENT OF ZOOLOGY**

### **Report -**

Students of the department conducted an Environment awareness rally using placards and played mime to give awareness on water conservation on 5<sup>th</sup> June 2017. The students and staff of the department as well as the Principal participated in the rally. The students went around the college campus and neighbouring locality calling out slogans. Placards were made by the students themselves using old cardboard and used chart paper. In doing this the students also realized the importance of reusing old material. Words written on the placard and those called out by the students were to create awareness on the importance of water, conservation of water and so on.

Water conservation needs to be a way of life, not just something we think about once in a while. If we all do our part in conserving Washington's water, we can make a huge difference for the environment. Water conservation means using our water wisely and caring for it properly. Since each of us depends on water for life, it is our responsibility to learn more about water conservation and how we can help keep our water pure and safe for generations to come. Since we all enjoy the benefits of having pure, clean water, we must help conserve water so that we may continue to enjoy these benefits.

Water conservation is not a job that is just for the technician, soil scientist, hydrologist, forester, wildlife manager, plant scientist, city planner, park manager, farmer, rancher, or mine owner alone. It is a job for the everyday person who just likes to have access to the life sustaining resource of water.

All the students of I DC, II DC and III DC participated in the event. This was then followed by a mime played by the students. The topic of the mine was also water conservation. In a creative way the students were able to convey the message to the audience and public.
