**(FYUGP Regulations 2024)**

**SACRED HEART COLLEGE (AUTONOMOUS), CHALAKUDY**

**BA ECONOMICS HONOURS**

**SYLLABUS**

## PROGRAMME OUTCOMES (PO):

At the end of the graduate programme at Sacred Heart College (Autonomous), Chalakudy, a student would:

PO1	<p><b>Knowledge Acquisition:</b></p> <p>Demonstrate a profound understanding of knowledge trends and their impact on the chosen discipline of study.</p>
PO2	<p><b>Communication, Collaboration, Inclusiveness, and Leadership:</b></p> <p>Become a team player who drives positive change through effective communication, collaborative acumen, transformative leadership, and a dedication to inclusivity.</p>
PO3	<p><b>Professional Skills:</b></p> <p>Demonstrate professional skills to navigate diverse career paths with confidence and adaptability.</p>
PO4	<p><b>Digital Intelligence:</b></p> <p>Demonstrate proficiency in varied digital and technological tools to understand and interact with the digital world, thus effectively processing complex information.</p>
PO5	<p><b>Scientific Awareness and Critical Thinking:</b></p> <p>Emerge as an innovative problem-solver and impactful mediator, applying scientific understanding and critical thinking to address challenges and advance sustainable solutions.</p>
PO6	<p><b>Human Values, Professional Ethics, and Societal and Environmental Responsibility:</b> Become a responsible leader, characterized by an unwavering commitment to human values, ethical conduct, and a fervent dedication to the well-being of society and the environment.</p>
PO7	<p><b>Research, Innovation, and Entrepreneurship:</b></p> <p>Emerge as a researcher and entrepreneurial leader, forging collaborative partnerships with industry, academia, and communities to contribute enduring solutions for local, regional, and global development.</p>

## PROGRAMME SPECIFIC OUTCOMES (PSO):

At the end of the BA Economics Honours programme at Sacred Heart College (Autonomous), Chalakudy, a student would:

PSO1	Understand basic concepts of economics
PSO2	Examine the socio-economic problems and find out the strategies to overcome these problems through community engagement
PSO3	Achieve organizational, management and leadership skills
PSO4	Acquire skills to evaluate contemporary socio-economic issues by accessing information from various sources and analyzing the collected information using software
PSO5	Understand diverse needs of the marginalized segments of the society and equip them to engage in endeavours leading to their emancipation
PSO6	Be able to inculcate ethical values and to avoid unethical practices such as plagiarism, misrepresentation of data and violation of intellectual property rights
PSO7	Apply analytical thinking to various economic phenomena, including analysis and evaluation of economic policies, practices, evidences, arguments, claims and beliefs
PSO8	Develop appropriate skills and knowledge to address the real world economic issues in familiar and unfamiliar contexts
PSO9	Formulate appropriate and relevant research questions, develop methodology and tools for data collection, presentation and analysis, and predict cause-effect relationships to deal with problems and situations to be solved through innovative practices

**MINIMUM CREDIT REQUIREMENTS OF THE DIFFERENT PATHWAYS  
IN THE THREE-YEAR PROGRAMME IN CUFYUGP**

Sl. No.	Academic Pathway	Major	Minor/ Other Disciplines	Foundation Courses AEC: 4 MDC: 3 SEC: 3 VAC: 3	Intern-ship	Total Credits	Example
		Each course has 4 credits		Each course has 3 credits			
1	Single Major (A)	68 (17 courses)	24 (6 courses)	39 (13 courses)	2	133	Major: Economics + six courses in different disciplines in different combinations
2	Major (A) with Multiple Disciplines (B, C)	68 (17 courses)	12 + 12 (3 + 3 = 6 courses)	39 (13 courses)	2	133	Major: Economics + History and Political Science
3	Major (A) with Minor (B)	68 (17 courses)	24 (6 courses)	39 (13 courses)	2	133	Major: Economics Minor: History
4	Major (A) with Vocational Minor (B)	68 (17 courses)	24 (6 courses)	39 (13 courses)	2	133	Major: Economics Minor: Taxation Practices and Procedures
5	Double Major (A, B)	A: 48 (12 courses)  B: 44 (11 courses)	-	12 + 18 + 9	2	133	Economics and Mathematics double major
<p>The 24 credits in the Minor stream are distributed between the two Majors. 2 MDC, 2 SEC, 2 VAC and the Internship should be in Major A. Total credits in Major A should be 48 + 20 = 68 (50% of 133) 1 MDC, 1 SEC and 1 VAC should be in Major B. Total credits in Major B should be 44 + 9 = 53 (40% of 133)</p>							
Exit with UG Degree / Proceed to Fourth Year with 133 Credits

## EVALUATION SCHEME

1. The evaluation scheme for each course contains two parts: internal evaluation (about 30%) and external evaluation (about 70%). Each of the Major and Minor courses is of 4 -credits. It is evaluated for 100 marks, out of which 30 marks is from internal evaluation and 70 marks, from external evaluation. Each of the General Foundation course is of 3 -credits. It is evaluated for 75 marks, out of which 25 marks is from internal evaluation and 50 marks, from external evaluation.
2. The 4-credit courses (Major and Minor courses) are of two types: (i) courses with only theory and (ii) courses with 3-credit theory and 1-credit practical.
  - In 4-credit courses with only theory component, out of the total 5 modules of the syllabus, one open-ended module with 20% content is designed by the faculty member teaching that course, and it is internally evaluated for 10 marks. The internal evaluation of the remaining 4 theory modules is for 20 marks.
  - In 4-credit courses with 3-credit theory and 1-credit practical components, out of the total 5 modules of the syllabus, 4 modules are for theory and the fifth module is for practical. The practical component is internally evaluated for 20 marks. The internal evaluation of the 4 theory modules is for 10 marks.
3. All the 3-credit courses (General Foundational Courses) in Economics are with only theory component. Out of the total 5 modules of the syllabus, one open-ended module with 20% content is designed by the faculty member teaching that course, and it is internally evaluated for 5 marks. The internal evaluation of the remaining 4 theory modules is for 20 marks.
4. The students can write the external examination in Economics either completely in English or in Malayalam.

Sl. No.	Nature of the Course		Internal Evaluation in Marks (about 30% of the total)		External Exam on 4 modules (Marks)	Total Marks
			Open-ended module / Practical	On the other 4 modules		
1	4-credit course	only theory (5 modules)	10	20	70	100
2	4-credit course	Theory (4 modules) + Practical	20	10	70	100
3	3-credit course	only theory (5 modules)	5	20	50	75

## 1. MAJOR AND MINOR COURSES

### 1.1. INTERNAL EVALUATION OF THEORY COMPONENT

Sl. No.	Components of Internal Evaluation of Theory Part of a Major / Minor Course	Internal Marks for the Theory Part of a Major / Minor Course of 4-credits			
		Theory Only		Theory + Practical	
		4 Theory Modules	Open-ended Module	4 Theory Modules	Practical
1	Test paper/ Mid-semester Exam	10	4	5	-
2	Seminar/ Viva/ Quiz	6	4	3	-
3	Assignment	4	2	2	-
Total		20	10	10	20*
		30		30	

\* Refer the table in section 1.2 for the evaluation of practical component

### 1.2. EVALUATION OF PRACTICAL COMPONENT

The evaluation of practical component in Major and Minor courses is completely by internal evaluation.

- Continuous evaluation of practical by the teacher-in-charge shall carry a weightage of 50%.
- The end-semester practical examination and viva-voce, and the evaluation of practical records shall be conducted by the teacher in-charge and an internal examiner appointed by the Department Council.
- The process of continuous evaluation of practical courses shall be completed before 10 days from the commencement of the end-semester examination.
- Those who passed in continuous evaluation alone will be permitted to appear for the end - semester examination and viva-voce.

The scheme of continuous evaluation and the end-semester examination and viva-voce of practical component shall be as given below:

Sl. No.	Evaluation of Practical Component of Credit-1 in a Major / Minor Course	Marks for Practical	Weightage
1	Continuous evaluation of practical/ exercise performed in practical classes by the students	10	50%
2	End-semester examination and viva-voce to be conducted by teacher-in-charge along with an additional examiner arranged internally by the Department Council	7	35%

3	Evaluation of the Practical records submitted for the end semester viva-voce examination by the teacher-in-charge and additional examiner	3	15%
Total Marks		20	

### 1.3. EXTERNAL EVALUATION OF THEORY COMPONENT

External evaluation carries 70% marks. Examinations will be conducted at the end of each semester. Individual questions are evaluated in marks and the total marks are converted into grades by the University based on 10-point grading system (refer section 5).

#### PATTERN OF QUESTION PAPER FOR MAJOR AND MINOR COURSES

Duration	Type	Total No. of Questions	No. of Questions to be Answered	Marks for Each Question	Ceiling of Marks
2 Hours	Short Answer	10	8 – 10	3	24
	Paragraph/ Problem	8	6 – 8	6	36
	Essay	2	1	10	10
Total Marks					70

## 2. INTERNSHIP

- All students should undergo Internship of 2-credits during the first six semesters in a firm, industry or organization, or training in labs with faculty and researchers of their own institution or other Higher Educational Institutions (HEIs) or research institutions.
- Internship can be for enhancing the employability of the student or for developing the research aptitude.
- Internship can involve hands-on training on a particular skill/ equipment/ software. It can be a short project on a specific problem or area. Attending seminars or workshops related to an area of learning or skill can be a component of Internship.
- A faculty member/ scientist/ instructor of the respective institution, where the student does the Internship, should be the supervisor of the Internship.

### 2.1. GUIDELINES FOR INTERNSHIP

1. All students shall undergo Internship or Apprenticeship in a firm, industry or organization, or training in labs with faculty and researchers of their own institution or other Higher Educational Institutions (HEIs) or research institutions.
2. For an internship, one credit of Internship means two-hour engagement per week. Accordingly, in a semester of 15 weeks' duration, two credits in this course is equivalent to 60 hours of engagement.

3. The students involved in the internship may continue their internship subject to the condition that his/her academic credits do not get affected in terms of attendance and other assignments. If the need arises, students may also have an opportunity to make use of summer & winter breaks for extending their learning from internships.
4. The internship aims to impart:
  - The students should have an understanding and ability to develop solutions for real-life problems.
  - The students will be made aware of the research ethics, professional accountability, conduct and will be able to practice the research ethics and appropriate skills in his/her own research work.
  - The student will be able to enhance academic productivity by developing writing and reading skills and can make contributions towards social and economic issues.
  - The intern can possess an attitude and skill of adaptability and flexibility for new challenges at organizational and individual level with a mindset of teamwork and collaborations.
  - To increase the likelihood of securing future employment and to explore and clarify carrier goals.
  - To develop a strong work ethics, time management and professionalism in a professional environment.
5. Role of Internship Coordinator
  - An internship coordinator is a teacher, who will be nominated by the Department Council (DC) for monitoring and supervising the student during the internship duration. This person will be nominated at the start of the academic year for each batch.
  - Internship Supervisor from the host institute should monitor the regularity of the intern at his/her workplace. On the completion of internship, the student should submit the project report in the prescribed format along with internship completion certificate issued by Internship Supervisor/authority from host organization. The project report shall be evaluated by faculty member delegated by the department council.
  - Students can choose following organizations and mentor from HEIs/research organizations/registered industries/registered media organizations/ and companies/registered retail service providers/R&D labs and centres. They can also opt Cooperative Organizations/Banking and nonbanking organizations/Insurance companies/Stock Broking Companies/Microfinance Institutions/Other national and international reputed institutions/libraries in HEIs and registered under library council /NGOs/certified farmers/plantations/local self-governing bodies/ outside India experts working at the

international level, Organizations under State Government/Central Government, elected representatives to the parliament/ state assembly. Students can also undertake an internship from national/international reputed institutions through online mode.

#### 6. Guidelines for Internship Report

- The Internship certificate should be certified by the Head of the Institution. It should contain the Name of the Student, Name of the Internship course, Name of the Institute, Type of work done and duration of work (60 hrs).
- Internship Report should contain 3000-5000 words typed in Times New Roman, size 12, 1.5 space, on double sides and neatly soft bound. It should be submitted to the concerned Department before VI Semester Exam Notification.
- The Internship Report should be in the following structure
  - a) Title page- Title of the Internship, Name and Register Number of the Student, Year, Name of the institute and name of the college and department.
  - b) Declaration
  - c) Certificate signed by the Head of the Institution (Internship Institute)
  - d) Index
  - e) Content Page - Introduction
    - Nature of the work
    - Methodology
    - Outcome of the work
    - Limitations
    - Suggestions

#### 2.2. EVALUATION OF INTERNSHIP

- The evaluation of Internship shall be done internally through continuous assessment mode by a committee internally constituted by the Department Council of the college where the student has enrolled for the UG Honours programme.
- The credits and marks for the Internship will be awarded only at the end of semester 6.
- The scheme of continuous evaluation and the end-semester viva-voce examination based on the submitted report shall be as given below:

Sl. No.	Components of Evaluation of Internship		Marks for Internship 2 Credits	Weightage
1	Continuous evaluation of internship through interim presentations and reports by the committee internally constituted by the Department Council	Acquisition of skill set	10	40%
2		Interim Presentation and Viva-voce	5	
3		Punctuality	5	

4	Report of Institute Visit/ Study Tour	5	10%
5	End-semester viva-voce examination to be conducted by the committee internally constituted by the Department Council	Quality of the work	6
6		Presentation of the work	5
7		Viva-voce	6
8	Evaluation of the day-to-day records, the report of internship supervisor, and final report submitted for the end semester viva-voce examination before the committee internally constituted by the Department Council	8	15%
Total Marks		50	

### 3. PROJECT

#### 3.1. PROJECT IN HONOURS PROGRAMME

- In Honours programme, the student has the option to do a Project of 12 -credits instead of three Core Courses in Major in semester 8.
- The Project can be done in the same institution/ any other higher educational institution (HEI)/ research centre/ training centre.
- The Project in Honours programme can be a short research work or an extended internship or a skill-based training programme.
- A faculty member of the respective institution, where the student does the Project, should be the supervisor of the Project.

#### 3.2. PROJECT IN HONOURS WITH RESEARCH PROGRAMME

- Students who secure 75% marks and above (equivalently, CGPA 7.5 and above) cumulatively in the first six semesters are eligible to get selected to Honours with Research stream in the fourth year.
- A relaxation of 5% in marks (equivalently, a relaxation of 0.5 grade in CGPA) is allowed for those belonging to SC/ ST/ OBC (non-creamy layer)/ Differently-Abled/ Economically Weaker Section (EWS)/ other categories of candidates as per the decision of the UGC from time to time.
- In Honours with Research programme, the student has to do a mandatory Research Project of 12-credits instead of three Core Courses in Major in semester 8.
- The approved research centres of University of Calicut or any other university/ HEI can offer the Honours with Research programme. The departments in the affiliated colleges under University of Calicut, which are not the approved research centres of the University, should get

prior approval from the University to offer the Honours with Research programme. Such departments should have minimum two faculty members with Ph.D., and they should also have the necessary infrastructure to offer Honours with Research programme.

- A faculty member of the University/ College with a Ph.D. degree can supervise the research project of the students who have enrolled for Honours with Research. One such faculty member can supervise maximum five students in Honours with Research stream.
- The maximum intake of the department for Honours with Research programme is fixed by the department based on the number of faculty members eligible for project supervision, and other academic, research, and infrastructural facilities available.
- If a greater number of eligible students are opting for the Honours with Research programme than the number of available seats, then the allotment shall be based on the existing rules of reservations and merits.

### **3.3. GUIDELINES FOR THE PROJECT IN HONOURS PROGRAMME AND HONOURS WITH RESEARCH PROGRAMME**

1. Project can be done in topics related to Economics.
2. Project should be done individually.
3. Project work can be of experimental/ theoretical/ analytical in nature.
4. There should be minimum 240 hrs. of engagement from the student in the Project work in Honours programme.
5. There should be minimum 13 hrs./week of engagement (the hours corresponding to the three core courses in Major in semester 8) from the teacher in the guidance of the Project(s) in Honours programme and Honours with Research programme.
6. The various steps in project works are the following:
  - Wide review of a topic.
  - Investigation on a problem in systematic way using appropriate techniques.
  - Systematic recording of the work.
  - Reporting the results with interpretation in a standard documented form.
  - Presenting the results before the examiners.
7. A hard copy of the report should be kept for reference at the department. A soft copy of the report should be submitted in pdf format for external evaluation well in advance.
8. It is desirable, but not mandatory, to publish the results of the Project in a peer reviewed journal.

9. The project report shall have declaration from the student and certificate from the research supervisor for originality of the work, stating that the work has not been submitted for the award of any other degree/ diploma in the same institution or any other institution.
10. Plagiarism check report has to be incorporated in the project report after the declaration of the student.
11. The project proposal, institution at which the project is being carried out, and the project supervisor should be prior-approved by the Department Council of the college where the student has enrolled for the UG Honours programme.
12. Structure of the Project
  - Cover Page and Front Page
    - a. Title of the project
    - b. Degree for which project is submitted.
    - c. Name of the Candidate & University Register Number
    - d. Name of the College
    - e. Month and year of the project report submission
  - Contents
    - a. Declaration by the student
    - b. Plagiarism check certificate
    - c. Certificate of the supervising teacher countersigned by the head of the department.
    - d. Acknowledgement.
    - e. Table of Contents
    - f. List of Tables
    - g. List of Figures
    - h. Introductory Chapter
    - i. Analysis Chapters
    - j. Concluding Chapter
    - k. Bibliography
    - l. Appendix
  - Contents of the Introductory Chapter
    1. Introduction
    2. Review of literature
    3. Research Gap
    4. Statement of the problem
    5. Significance of the study

6. Scope of the study
7. Statement of objectives
8. Hypotheses (optional)
9. Methodology
  - a. Data sources
  - b. Tools of analysis (quantitative and qualitative)
  - c. Conceptual Framework-Optional (specification of terms and concepts)
10. Limitations of the study
11. Chapter outlines.

➤ **Style of Report**

1. Report Length: 50 to 70 pages excluding Appendix and Certificates
2. Alignment: Justify
3. Font: Times New Roman
4. Font size: 12
4. Line spacing: 1.5
5. Bibliography: APA style

### **3.4. EVALUATION OF PROJECT**

- The evaluation of Project will be conducted at the end of the eighth semester by both internal and external modes.
- The Project in Honours programme as well as that in Honours with Research programme will be evaluated for 300 marks. Out of this, 90 marks is from internal evaluation and 210 marks, from external evaluation.
- The internal evaluation of the Project work shall be done through continuous assessment mode by a committee internally constituted by the Department Council of the college where the student has enrolled for the UG Honours programme. 30% of the weightage shall be given through this mode.
- The remaining 70% shall be awarded by the external examiner appointed by the College.
- The scheme of continuous evaluation and the end-semester viva-voce of the Project shall be as given below:

Components of Evaluation of Project	Marks for the Project (Honours/ Honours with Research)	Weightage
Continuous evaluation of project work through interim presentations and reports by the committee internally constituted by the Department Council	90	30%
End-semester viva-voce examination to be conducted by the external examiner appointed by the College	150	50%
Evaluation of the day-to-day records and project report submitted for the end-semester viva-voce examination conducted by the external examiner	60	20%
Total Marks	300	

#### INTERNAL EVALUATION OF PROJECT

Sl. No	Components of Evaluation of Project	Marks for the Project (Honours/ Honours with Research)
1	Skill in doing project work	30
2	Interim Presentation and Viva-Voce	20
3	Punctuality and Log book	20
4	Scheme/ Organization of Project Report	20
Total Marks		90

#### EXTERNAL EVALUATION OF PROJECT

Sl. No	Components of Evaluation of Project	Marks for the Project (Honours/ Honours with Research) 12 credits
1	Content and relevance of the Project, Methodology, Quality of analysis, and Innovations of Research	50
2	Presentation of the Project	50
3	Project Report (typed copy), Log Book and References	60
4	Viva-Voce	50
Total Marks		210

## 5. GENERAL FOUNDATION COURSES

- All the General Foundation Courses (3-credits) in Economics are with only theory component.

### 5.1. INTERNAL EVALUATION

Sl. No.	Components of Internal Evaluation of a General Foundation Course in Economics	Internal Marks of a General Foundation Course of 3-credits in Economics	
		4 Theory Modules	Open-ended Module
1	Test paper/ Mid-semester Exam	10	2
2	Seminar/ Viva/ Quiz	6	2
3	Assignment	4	1
Total		20	5
		25	

### 5.2. EXTERNAL EVALUATION

External evaluation carries about 70% marks. Examinations will be conducted at the end of each semester. Individual questions are evaluated in marks and the total marks are converted into grades by the University based on 10-point grading system (refer section 5).

### PATTERN OF QUESTION PAPER FOR GENERAL FOUNDATION COURSES

Duration	Type	Total No. of Questions	No. of Questions to be Answered	Marks for Each Question	Ceiling of Marks
1.5 Hours	Short Answer	10	8 – 10	2	16
	Paragraph/ Problem	5	4 – 5	6	24
	Essay	2	1	10	10
Total Marks					50

## 6. LETTER GRADES AND GRADE POINTS

- Mark system is followed for evaluating each question.
- For each course in the semester letter grade and grade point are introduced in 10-point indirect grading system as per guidelines given below.
- The Semester Grade Point Average (SGPA) is computed from the grades as a measure of the student's performance in a given semester.
- The Cumulative GPA (CGPA) is based on the grades in all courses taken after joining the programme of study.
- Only the weighted grade point based on marks obtained shall be displayed on the grade card issued to the students.

**LETTER GRADES AND GRADE POINTS**

Sl. No.	Percentage of Marks (Internal & External Put Together)	Description	Letter Grade	Grade Point	Range of Grade Points	Class
1	95% and above	Outstanding	O	10	9.50 – 10	First Class with Distinction
2	Above 85% and below 95%	Excellent	A+	9	8.50 – 9.49	
3	75% to below 85%	Very Good	A	8	7.50 – 8.49	
4	65% to below 75%	Good	B+	7	6.50 – 7.49	First Class
5	55% to below 65%	Above Average	B	6	5.50 – 6.49	
6	45% to below 55%	Average	C	5	4.50 – 5.49	Second Class
7	35% to below 45% aggregate (internal and external put together) with a minimum of 30% in external valuation	Pass	P	4	3.50 – 4.49	Third Class
8	Below an aggregate of 35% or below 30% in external evaluation	Fail	F	0	0 – 3.49	Fail
9	Not attending the examination	Absent	Ab	0	0	Fail

- When students take audit courses, they will be given Pass (P) or Fail (F) grade without any credits.
- The successful completion of all the courses and capstone components prescribed for the three-year or four-year programme with 'P' grade shall be the minimum requirement for the award of UG Degree or UG Degree Honours or UG Degree Honours with Research, as the case may be.

**6.1. COMPUTATION OF SGPA AND CGPA**

- The following method shall be used to compute the Semester Grade Point Average (SGPA):  
The SGPA equals the product of the number of credits ( $C_i$ ) with the grade points ( $G_i$ ) scored by a student in each course in a semester, summed over all the courses taken by a student in the semester, and then divided by the total number of credits of all the courses taken by the student in the semester,

$$\text{i.e. SGPA } (S_i) = \sum_i (C_i \times G_i) / \sum_i (C_i)$$

where  $C_i$  is the number of credits of the  $i^{\text{th}}$  course and  $G_i$  is the grade point scored by the student in the  $i^{\text{th}}$  course in the given semester. Credit Point of a course is the value obtained by multiplying the credit ( $C_i$ ) of the course by the grade point ( $G_i$ ) of the course.

$$\text{SGPA} = \frac{\text{Sum of the credit points of all the courses in a semester}}{\text{Total credits in that semester}}$$

**ILLUSTRATION – COMPUTATION OF SGPA**

Semester	Course	Credit	Letter Grade	Grade point	Credit Point (Credit x Grade)
I	Course 1	3	A	8	3 x 8 = 24
I	Course 2	4	B+	7	4 x 7 = 28
I	Course 3	3	B	6	3 x 6 = 18
I	Course 4	3	O	10	3 x 10 = 30
I	Course 5	3	C	5	3 x 5 = 15
I	Course 6	4	B	6	4 x 6 = 24
	Total	20			139
	SGPA				139/20 = 6.950

- The Cumulative Grade Point Average (CGPA) of the student shall be calculated at the end of a programme. The CGPA of a student determines the overall academic level of the student in a programme and is the criterion for ranking the students.

CGPA for the three-year programme in CUFYUGP shall be calculated by the following formula.

$$\text{CGPA} = \frac{\text{Sum of the credit points of all the courses in six semesters}}{\text{Total credits in six semesters (133)}}$$

CGPA for the four-year programme in CUFYUGP shall be calculated by the following formula.

$$\text{CGPA} = \frac{\text{Sum of the credit points of all the courses in eight semesters}}{\text{Total credits in eight semesters (177)}}$$

- The SGPA and CGPA shall be rounded off to three decimal points and reported in the transcripts.
- Based on the above letter grades, grade points, SGPA and CGPA, the College shall issue the transcript for each semester and a consolidated transcript indicating the performance in all semesters.

---

*Major Courses in Economics*

---

Programme	B.A. Economics Honours				
Course Title	<b>PRINCIPLES OF ECONOMICS</b>				
Type of Course	<b>Major</b>				
Semester	I				
Academic Level	100 - 199				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	3	-	2	75
Pre-requisites	Basic Economics Course of 0 – 99 level				
Course Summary	This course explores important principles, basic theories and models, various economic systems and other fundamental aspects of economics.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Understand the basic principles of economics and its real-world applications.	U	C	Instructor-created exams / Quiz
CO2	Develop and practice the skill of thinking like an economist.	Ap	P	Practical Assignment / Observation of Practical Skills
CO3	Help the beginning student master the principles essential for understanding the economizing problem, specific economic issues, and policy alternatives.	U	P	Seminar Presentation / Group Discussion
CO4	Understand and apply the economic perspective and reason accurately and objectively about economic matters.	Ap	C	Instructor-created exams / Home Assignments
CO5	Instil in students a fascination with both the functioning of the economy and the power and breadth of economics	U	F	Writing assignments
CO6	Demonstrate critical thinking and problem-solving skills by applying the acquired knowledge to address complex economic challenges in the contemporary world.	Ap	P	Viva Voce
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
I	<b>Basic Principles of Economics</b>		<b>10</b>	<b>15</b>
	<b>How People Make Decisions</b>			
	1	People Face Trade-Offs	1	
	2	The Cost of Something Is What You Give	1	
	3	Rational People Think at the Margin	1	
	4	People Respond to Incentives	1	
	<b>How People Interact</b>			
	5	Trade Can Make Everyone Better Off	1	
	6	Markets Are Usually a Good Way to Organize Economic Activity	1	
	7	Governments Can Sometimes Improve Market Outcomes	1	
	<b>How the Economy as a Whole Works</b>			
	8	A Country's Standard of Living Depends on its Ability to Produce Goods and Services	1	
	9	Prices Rise When the Government Prints Too Much Money	1	
10	Society Faces a Short-Run Trade-Off between Inflation and Unemployment	1		
II	<b>Thinking like an Economist</b>		<b>10</b>	<b>15</b>
	11	<b>The Economist as Scientist:</b> The Scientific Method: Observation, Theory, and More Observation, The Role of Assumptions, Economic Models, The Circular-Flow Diagram, The Production Possibilities Frontier, Microeconomics and Macroeconomics;	4	
	12	<b>The Economist as Policy Adviser:</b> Positive versus Normative Analysis, Why Economists' Advice Is Not Always Followed;	3	
	13	<b>Why Economists Disagree:</b> Differences in Scientific Judgments, Differences in Values, Perception versus Reality	3	
III	<b>Limits, Alternatives, and Choices</b>		<b>10</b>	<b>15</b>
	14	<b>The Economic Perspective:</b> Scarcity and Choice, Purposeful Behaviour, Marginal Analysis: Comparing Benefits and Costs	3	
	15	<b>Individual's Economizing Problem</b>	2	
	16	<b>Society's Economizing Problem</b>	2	
	17	<b>Unemployment, Growth, and the Future:</b> A Growing Economy, Present Choices and Future Possibilities, A Qualification: International Trade	3	
IV	<b>The Market System</b>		<b>15</b>	<b>25</b>
	18	<b>Economic Systems:</b> Laissez-Faire Capitalism, The Command System, The Market System	2	
	19	<b>Characteristics of the Market System:</b> Private Property, Freedom of Enterprise and Choice, Self-Interest, Competition, Markets and Prices, Technology and Capital Goods, Specialization, Use of Money, Active but Limited Government	2	
	20	<b>Five Fundamental Questions:</b> What Will Be Produced?	4	

		How Will the Goods and Services Be Produced? Who Will Get the Output? How Will the System Accommodate Change? How Will the System Promote Progress?		
	21	<b>The “Invisible Hand”</b> : The Demise of the Command Systems, The Incentive Problem	3	
	22	<b>How the Market System Deals with Risk</b> : The Profit System, Shielding Employees and Suppliers from Business Risk, Benefits of Restricting Business Risk to Owners	4	
	<b>Open Ended Module</b>		<b>30</b>	
<b>V</b>		<b>Discussion</b> based on different economic systems prevailing in the world		
		<b>Practical Assignments</b> on economic decision making in different economies in the world		
		<b>Seminar</b> on the influence of institutions, regional cooperations, blocks and international cartels on economic policies		

**Note:** The syllabus has five modules. There should be total 22 units in the first four modules together, composed of the theory topics. The number of units in the last module can vary. There are 45 instructional hours for the first four modules and 30 hrs for the final one. Module V is designed to equip students with practical skills. The 20 marks for the evaluation of practical will be based on Module V. Internal assessments (30 marks) are split between the practical module (20 marks) and the first four modules (10 marks). The end-semester examination for the theory part will be based on the 22 units in the first four modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>FOUNDATIONS OF ECONOMICS OF FINANCE</b>				
Type of Course	<b>Major</b>				
Semester	II				
Academic Level	100 - 199				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	3	-	2	75
Pre-requisites	Basic Economics Course of 0 – 99 level				
Course Summary	This course provides students with foundational knowledge in personal finance, investment, insurance, and financial planning. It empowers them to make informed financial decisions through conceptual learning and practical application. Emphasis is placed on financial literacy, risk-return analysis, and real-time market evaluation for responsible financial behavior.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Explain the fundamental concepts of personal finance, financial literacy, and the time value of money.	U	C	Instructor-created exams / Quizzes
CO2	Apply the process of financial planning and identify suitable investment avenues for individual goals.	Ap	P	Practical Assignment / Project Work
CO3	Analyze risk and return characteristics of different financial instruments to make informed choices.	An	C	Case Study / Problem-solving Exercises
CO4	Evaluate the role of insurance in financial planning and examine different types of insurance products.	E	P	Instructor-created exams / Home Assignments
CO5	Develop basic financial decision-making skills by linking personal finance concepts with real-life economic issues.	C	M	Seminar Presentation / Group Discussion / Viva Voce
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
I	<b>Fundamentals of Personal Finance and Financial Planning</b>		<b>10</b>	<b>15</b>
	1	<b>Introduction:</b> Financial Literacy, Financial Education, Financial wellbeing, Relationship between financial Education and financial well-being	2	
	2	<b>Financial Planning:</b> Definition, scope, and relevance in today's economy	2	
	3	<b>Personal Finance:</b> Meaning, need, objectives, and components.	2	
	4	<b>Basic Concepts:</b> Income, Expenditure, Saving, Investment, Debt, Assets, Liabilities, Liquidity, Risk, Return, Inflation.	2	
	5	<b>Mathematics of Cash Flow:</b> Time Value of Money (TVM): Concept, Feature, Importance and Mode of Calculations – present value, future value, Annuities, perpetuities, compounding and discounting techniques, Power of compounding, Doubling Period	2	
II	<b>Process of Financial Planning and Investment avenues</b>		<b>10</b>	<b>15</b>
	6	<b>Process of Financial Planning:</b> Determination Current Financial Situation	2	
	7	<b>Development of Financial Goals:</b> Specific, Measurable, Achievable, Realistic, and Time-bound (SMART)	2	
	8	Approach to Achieving Financial Goals, Portfolio Diversification and its importance in Financial Planning	2	
	9	<b>Investment Avenues:</b> Equity shares and stock markets. Fixed income securities (bonds, debentures)	2	
	10	Mutual funds, Real estate investments, Derivatives (futures & options) – basic overview, Small savings schemes (PPF, NSC, SCSS, etc.), Gold investments (sovereign gold bonds, digital gold, gold ETFs)	2	
III	<b>Measuring Investment Risk and Returns</b>		<b>10</b>	<b>15</b>
	11	<b>Returns:</b> Definition and measurement: absolute, annualized, CAGR)	2	
	12	Complexities in calculating returns and practical issues	2	
	13	<b>Risks:</b> Meaning and types (systematic vs. unsystematic)	2	
	14	<b>Measuring risk:</b> standard deviation, beta, value at risk	2	
	15	Portfolio risk and return – diversification and correlation, Risk-adjusted performance metrics, Strategies for managing investment risk, Comparison of instruments on basis of risk, return, liquidity	2	
IV	<b>Insurance and Risk Analysis</b>		<b>15</b>	<b>25</b>
	16	<b>Fundamentals of Insurance:</b> Nature of insurance contracts, legal principles, and liabilities	2	
	17	Role of insurance in personal risk management and financial planning	2	
	18	<b>Regulatory Framework:</b> IRDAI guidelines, insurance ethics, and consumer protection	2	

	19	<b>Life Insurance:</b> Types of life policies and strategies, Life Insurance Institutions	2
	20	Human Life Value (HLV), Need Analysis, Insurance as a tool for wealth and estate planning	2
	21	<b>General Insurance:</b> Property, health, motor, travel, and liability insurance, General Insurance Institutions	2
	22	<b>Insurance Mathematics:</b> Premium calculation basics, probability of loss, mortality tables	3
	<b>Open Ended Module</b>		<b>30</b>
<b>V</b>		Financial Product Comparison Task: Deep-dive comparison of 3–4 financial products (e.g., Term Insurance vs ULIP vs Endowment Plans OR SIP vs RD vs FD). Criteria: Risk, return, taxation, liquidity, transparency. Deliverable: Comparison chart and recommendation.	
		App/Platform Evaluation Project Task: Students evaluate 2–3 apps in the personal finance space (Groww, Zerodha, Paytm Money, Upstox, etc.) Parameters: Ease of use, features, target audience, compliance, data security. Deliverable: Evaluation grid + recommendation	
		Weekly Indian Financial Market Evaluation Presentation (Share Market and Gold Market) Activity Type: Group Frequency: Once a week	

**Note:** The syllabus has five modules. There should be total 22 units in the first four modules together, composed of the theory topics. The number of units in the last module can vary. There are 45 instructional hours for the first four modules and 30 hrs for the final one. Module V is designed to equip students with practical skills. The 20 marks for the evaluation of practical will be based on Module V. Internal assessments (30 marks) are split between the practical module (20 marks) and the first four modules (10 marks). The end-semester examination for the theory part will be based on the 22 units in the first four modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>ANALYTICAL TOOLS FOR ECONOMICS I</b>				
Type of Course	<b>Major</b>				
Semester	III				
Academic Level	200 - 299				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Basic Economics Course of 0 – 99 level				
Course Summary	Students shall acquire in-depth knowledge and able to explain the concepts of sets, functions, Differentiation, Integration and their applications in Economics.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	To Understand the basic concept of set theory and functions	U	C	Instructor-created exams / Quiz
CO2	To Apply differentiation in solving economic problems	Ap	P	Practical Assignment / Observation of Practical Skills
CO3	To apply integration in solving economic problems	U	P	Seminar Presentation / Group Discussion
CO4	To analyse relationship between economic variables mathematically, analyze, optimize and interpret them	An	P	Instructor-created exams / Home Assignments
CO5	To equip the students to identify a problem, investigate to find out relevant facts and find a logical conclusion	Ap	F	Viva Voce/Project
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Set theory and Functions</b>		<b>10</b>	<b>15</b>
	1	Set theory: concepts, set operations, relations, functions and their properties	4	
	2	Elementary types of functions – linear, quadratic, cubic, polynomial, exponential and logarithmic	3	
	3	Graphs of functions-linear and quadratic algebraic functions	1	
	4	Applications of functions in Economics	2	
<b>II</b>	<b>Differential Calculus</b>		<b>18</b>	<b>25</b>
	5	Limits and continuity of functions	2	
	6	Meaning of Derivative, Rules, Derivative of single variable and multi variable (except trigonometric function)	2	
	7	Derivatives of implicit functions and Inverse functions	2	
	8	Rate of change- Slope of a curve	2	
	9	Partial Differentiation	2	
	10	Marginal concepts related to Economic functions, Elasticity	2	
	11	Second order Derivatives	2	
	12	Conditions for Optimisation, Single and Multivariate Optimisation	2	
	13	Application in consumption and production decisions	2	
	<b>III</b>	<b>Integral Calculus</b>		
14		Meaning of integral, The Definite Integral, Rules of Integration, Integration by substitution	3	
15		Integration by parts	2	
16		Area under a curve-estimation of producers and consumers surplus.	1	
17		The First and Second Fundamental Theorems of Calculus	2	
18		The Mean Value Theorem for integrals.	2	
<b>IV</b>	<b>Linear Models and Matrix</b>		<b>10</b>	<b>15</b>
	19	Matrix: Meaning, Types and operations	2	
	20	Linear Models and Matrix Algebra and their Applications in Economics	3	
	21	Rank of a Matrix- Solving linear equations using Matrix Inverse	2	
	22	Determinants, Properties of Determinants and Cramer's Rule and their applications	3	
<b>V</b>	<b>Open Ended Module</b>		<b>12</b>	
	1	Develop critical thinking and problem-solving skills by applying statistical methods in Economic theories		

2	Discussion based on statistical tools	
3	Practical Assignments	
4	Seminar	

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

**DETAILED SYLLABUS:**

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>People and Markets (Microeconomics) – Market mechanism, Competition, Price and Utility</b>		<b>13</b>	<b>19</b>
	<b>The Invisible Hand of the Market</b>			
	1	From Mercantilism to Market Economy	1	
	2	Monopolies and the Cournot Point	1	
	<b>Competition in Theory and in Practice</b>			
	3	From “Perfect Competition” to Dynamic Competition	1	
	4	Competition Policy: Harvard versus Chicago	1	
	5	Natural Monopolies and Government Market Access	1	

		Barriers		
		<b>Prices, Costs and Profits</b>		
	6	Alfred Marshall's Scissor Theorem	1	
	7	The Laws of Large-Scale Production and Their Limits	1	
	8	Turgot's Law of Returns and Marshall's Producers' Surplus	1	
	9	Trade Margins and Speculation	1	
	10	Fair Prices and Government Intervention into Markets	1	
		<b>The Utility and Real Value of Commodities:</b>		
	11	The Classical Paradox of Value and Gossen's Laws,	1	
	12	Pareto Optimality and Distribution of Income,	1	
	13	Consumer Sovereignty and Merit Goods	1	
<b>II</b>		<b>People and Markets (Microeconomics) –Market Failure, Wage and Capital</b>	<b>10</b>	<b>15</b>
	14	<b>Causes of Market Failure:</b> Should the State Act as Night Watchman? Natural Collective Goods, The Non-Applicability of the Exclusion Principle, Externalities and Environmental Problems, Are Environmental Taxes and Charges Unjust? Voluntary Negotiations: The Coase Theorem, The Environment and Politics	4	
	15	<b>Fair Wages and the Right to Work:</b> Thunen's Equation for a Natural Wage, Karl Marx's Labour Theory of Value, Problems of Socialism, The Pareto Curve, Minimum Wages and Maximum Income Limits? Productivity and Wage Rates	3	
	16	<b>The Mystery of Capital and Interest:</b> Interest Rates and Bans on Interest, Who do Capital Gains Belong to? Bohm-Bawerk's Third Reason, Paradoxes of Capital Theory, Natural Interest Rates and Monetary Policy	3	
<b>III</b>		<b>Crises of Market Economies (Macroeconomics) – Money and Business Cycle</b>	<b>13</b>	<b>19</b>
	17	<b>How Does Money Enter the Economy?</b> From Shell Money to the Peel Banking Act, Money Supply and Price Levels	3	
	18	<b>Business Cycles and Shortages in Demand:</b> Francois Quesnay's Tableau Economique, The Say Theorem, Marx's Theory of Crises and the Theory of the Purchasing Power of Wages, The Keynesian Revolution	5	
	19	<b>Why Do Business Cycles Fluctuate?</b> Knife-Edge Growth, Aftalion's Use of Fire as an Example: The Accelerator Principle, Business Cycle Policy: Is it Possible to Master the Chaos? Business Cycle Theory at a Political Level, The Influence of Politicians on the Business Cycle	5	
<b>IV</b>		<b>Crises of Market Economies (Macroeconomics) – Inflation, Unemployment and Growth</b>	<b>12</b>	<b>17</b>
	20	<b>Inflation and Unemployment:</b> The Quantity Theory, The Controversy about the Philips Curve, The Bullionist Controversy	4	
	21	<b>Growth and Wealth:</b> In Praise of Saving, Shortages of	4	

		Capital and Underdevelopment, The Golden Rule of Accumulation, The Connection Between Interest Rates and Growth Rates		
	22	<b>Limits of Economic Growth:</b> The Oil Price Shocks of the 1970s, Are the World's Raw Materials Running Out? The "Robber-Booty" Problem and the Hotelling Rule, Is there any Justice for Future Generations?	4	
<b>V</b>	<b>Open Ended Module</b>		<b>12</b>	
		<b>Discussion</b> based on reports about economic problems such as high unemployment or rising government debt.		
		<b>Practical Assignments</b> to trace the evolution of major ideas through time		
		<b>Seminar</b> on the influence and value of different writers and their contributions to the development of modern economic thought		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>INTERMEDIATE MICROECONOMICS</b>				
Type of Course	<b>Major</b>				
Semester	IV				
Academic Level	20 <sup>a</sup> – 299				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Basic Economics of 100 – 199 level				
Course Summary	This course focuses on the behaviour of consumers under certain conditions, optimisation in production, different conditions prevailing in competitive markets and the choices of a competitive firm.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO 1	To understand the core concepts and methods of microeconomics	U	C	Instructor-created exams / Practical Assignment
CO 2	Understand the basic elements of consumption and production theories.	U	F	Writing assignments / Quiz
CO 3	To analyze the consumer choice under different conditions of preferences.	An	P	Observation of Practical Skills / Group Discussion
CO 4	Apply the economic perspective and reason accurately in relation to different competitive market conditions.	Ap	P	Observation of Practical Skills / Home Assignments
CO 5	To solve and interpret stylized problems based on microeconomic models.	An	P	Group Discussion / Instructor-created exams
CO 6	Use microeconomic models to evaluate real-world microeconomic phenomena and issues.	E	M	Practical Assignment Viva Voce

**DETAILED SYLLABUS:**

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Choice Under Certainty</b>		<b>10</b>	<b>15</b>
	1	Optimal Choice determination: Budget Line – Marginal Rate of Substitution;	2	
	2	Consumer's Equilibrium using indifference curves -	2	
	3	Interior Optimum - Boundary Optimum.	2	
	4	Optimisation: Perfect Substitutes and Perfect Complements.	2	
	5	Estimating Utility Functions and implication of the MRS condition.	2	
<b>II</b>	<b>Comparative Statics in Consumer Theory</b>		<b>14</b>	<b>20</b>
	6	Offer Curves: Income Offer Curves- Engel Curves – Normal, Inferior and Giffen Goods –	3	
	7	Perfect Substitutes and Perfect Complements – Homothetic and Quasilinear preferences - Price Offer Curves:	2	
	8	Perfect Substitutes and Perfect Complements – Discrete Goods – Inverse Demand Function	1	
	9	Revealed Preference Approach: WARP and SARP;	2	
	10	The total change in demand: The substitution effect and income effect with suitable examples.	2	
	11	Rates of changes	1	
	12	Elasticity-Price elasticity of demand-The elasticity of linear demand curve-Income elasticity of demand; cross elasticity of demand;	2	
	13	Consumer Surplus.	1	
	<b>III</b>	<b>Optimisation In Production</b>		
14		Short run and long run production function- Cost curves- Profit Maximisation in the Short Run and Long Run.	5	
15		Cost Minimisation - Returns to Scale and the Cost Function	5	
16		Cobb Douglas Production Function	2	

<b>IV</b>	<b>The Analysis of Competitive Markets</b>		<b>12</b>	<b>18</b>
	17	Short run and long run Equilibrium in perfectly competitive firm and industry	3	
	18	Monopoly – linear demand curve – Mark up pricing – Inefficiency of monopoly-Dead Weight Loss-	2	
	19	Price Discrimination-bundling-Two-part tariffs	2	
	20	Monopolistic Competition-Product differentiation-selling cost	2	
	21	Oligopoly-collusive versus non-collusive oligopoly-	2	
	22	Kinked demand curve model.	1	
<b>V</b>	<b>Open ended module</b>		<b>12</b>	
		Discussion based on different market structures in the world		
		Seminars to analyse changing equilibrium conditions under different market structures.		
		Practical Assignments to compare and relate market of different products with different market structures.		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>INTERMEDIATE MACROECONOMICS</b>				
Type of Course	<b>Major</b>				
Semester	IV				
Academic Level	200 - 299				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Basic Economics Course of 100 – 199 level				
Course Summary	This course explores important concepts, basic theories and models and other fundamental macro aspects of economics.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Understand the important concepts of economics and its real-world applications.	U	C	Instructor-created exams / Quiz
CO2	Develop and practice the skill of thinking like an economist.	Ap	P	Practical Assignment / Observation of Practical Skills
CO3	Help the student master the macroeconomic aspects essential for understanding the economic climate, specific economic issues, and policy alternatives.	U	P	Seminar Presentation / Group Discussion
CO4	Understand and apply the macroeconomic perspective and reason accurately and objectively about economic matters.	Ap	C	Instructor-created exams / Home Assignments
CO5	To make the students curious about the functioning of the economy and the power and breadth of economics	U	F	Writing assignments
CO6	Demonstrate critical thinking and problem-solving skills by applying the acquired knowledge to address complex economic challenges in the contemporary world.	Ap	P	Viva Voce
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Classical Macroeconomics</b>		<b>12</b>	<b>17</b>
	1	The Classical Revolution, Production, Employment: Labor Demand, Labor Supply,	2	
	2	Equilibrium Output and Employment: The Determinants of Output and Employment, Factors That Do Not Affect Output,	2	
	3	The Quantity Theory of Money: The Equation of Exchange, The Cambridge Approach to the Quantity Theory,	2	
	4	Theory, The Classical Aggregate Demand Curve, The Classical Theory of the Interest Rate,	3	
	5	Policy Implications of the Classical Equilibrium Model: Fiscal Policy, Monetary Policy	3	
<b>II</b>	<b>The Keynesian System</b>		<b>12</b>	<b>17</b>
	6	The Problem of Unemployment, The Simple Keynesian Model: Conditions for Equilibrium Output,	2	
	7	The Components of Aggregate Demand: Consumption, Investment, Government Spending and Taxes,	2	
	8	Determining Equilibrium Income, Changes in Equilibrium Income,	1	
	9	Fiscal Stabilization Policy,	1	
	10	Exports and Imports in the Simple Keynesian Model Money in the Keynesian System: Interest Rates and Aggregate Demand,	2	
	11	The Keynesian Theory of the Interest Rate,	2	
	12	The Keynesian Theory of Money Demand, The Effects of an Increase in the Money Supply	2	
<b>III</b>	<b>The orthodox Keynesian school</b>		<b>12</b>	<b>17</b>
	13	The IS–LM model for a closed economy: Money Market Equilibrium: The LM Schedule, Product Market Equilibrium:	2	
	14	The IS Schedule, The IS and LM Schedules Combined, Underemployment equilibrium in the Keynesian model,	2	
	15	Factors That Affect Equilibrium Income and the Interest Rate:	1	
	16	Monetary Influences: Shifts in the LM Schedule, Real Influences: Shifts in the IS Schedule,	1	
	17	The Relative Effectiveness of Monetary and Fiscal Policy: Policy Effectiveness and the Slope of the IS Schedule, Policy Effectiveness and the Slope of the LM Schedule,	2	
	18	The IS–LM model for an open economy,	2	

	19	The Phillips curve and orthodox Keynesian economics, The central propositions of orthodox Keynesian economics	2	
<b>IV</b>	<b>Aggregate Supply and Demand</b>		<b>13</b>	<b>19</b>
	20	The Keynesian Aggregate Demand Schedule, The Keynesian Aggregate Demand Schedule Combined with the Classical Theory of Aggregate Supply,	3	
	21	A Contractual View of the Labor Market: Sources of Wage Rigidity, A Flexible Price–Fixed Money Wage Model, Labor Supply and Variability in the Money Wage: Classical and Keynesian Theories of Labor Supply,	3	
	22	The Keynesian Aggregate Supply Schedule with a Variable Money Wage, Policy Effects in the Variable-Wage Keynesian Model,	3	
	23	The Effects of Shifts in the Aggregate Supply Schedule: Factors That Shift the Aggregate Supply Schedule	4	
<b>V</b>	<b>Open ended module</b>		<b>12</b>	
		<b>Discussion</b> based on different schools of thought		
		<b>Practical Assignments</b>		
		<b>Seminar</b>		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>ANALYTICAL TOOLS FOR ECONOMICS II</b>				
Type of Course	<b>Major</b>				
Semester	IV				
Academic Level	200-299				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Basic Economics Course of 0 – 99 level				
Course Summary	This course introduces students about statistical methods for economic analysis. Students shall acquire in-depth knowledge in the concepts of probability, probability distributions, theory of estimation, hypothesis testing and their applications in economic analysis.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO 1	Basic understanding of computation of probability.	U	C	Instructor-created exams / Quiz
CO 2	Identify various probability distributions and its applications	Ap	P	Practical Assignment / Observation of Practical Skills
CO 3	Understand estimation of mean, variance and population of parameters of sampling distributions	U	P	Seminar Presentation / Group Discussion
CO 4	Understand and Apply hypothesis testing for economics theories	Ap	C	Instructor-created exams / Home Assignments
CO 5	Develop critical thinking and problem-solving skills by applying statistical methods in Economic theories and acquired knowledge to address complex economic challenges in the contemporary world.	Ap	F	Viva Voce/Project
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Elementary Probability Theory</b>		<b>14</b>	<b>21</b>
	1	Concepts- Set theory- Permutations and Combinations, Definitions of Probability - classical, empirical and axiomatic approaches- Addition and multiplication laws	3	
	2	Conditional probability- Bay's theorem	2	
	3	Random variables- probability distribution- Mathematical expectation- moments	3	
	4	Two random variables: joint, Marginal and conditional probability functions	3	
	5	Computing expected values- Covariance and correlation coefficients	3	
<b>Probability Distributions</b>			<b>11</b>	<b>16</b>
<b>II</b>	6	Discrete Probability Distributions, Binomial, Poisson, Uniform - simple applications	4	
	7	Continuous probability distributions- Normal, Lognormal and Exponential Distributions (Derivations are not expected)	4	
	8	Concept of law of large numbers and Central limit theorem	1	
	9	Distribution function- Distribution function of one random variable	2	
<b>III</b>	<b>Theory of Estimation</b>		<b>12</b>	<b>17</b>
	10	Statistical Inference, Concept of population, sample- Sampling distributions- Standard error	3	
	11	Distributions of sample mean, Sample variance - chi square Student's t, and F distributions	3	
	12	Small and large sample properties of Z, t, Chi Square and F	2	
	13	Estimation of population parameters using method of OLS	1	
	14	Estimation of population parameters using method of maximum likelihood procedures	1	
	15	Point and interval estimation- Confidence intervals for population parameters	1	
	16	Properties of estimators	1	
<b>IV</b>	<b>Testing of Hypothesis</b>		<b>11</b>	<b>16</b>
	17	Simple and composite hypothesis- Null and alternative hypothesis	1	
	18	Type I and Type II error, Critical region- Level of significance, Power of a test	1	
	19	Test procedure - Test of significance in respect of Mean, Proportion, Variance and Correlation coefficient and their differences	2	
	20	Chi Square test of goodness of fit, and test for independence of attributes	2	

	21	Non-parametric tests - Sign test, Wilcoxon- Mann Whitney U Test, Signed rank test	3	
	22	Kruskal Wallis test, Wald-Wolfowitz test	2	
<b>V</b>	<b>Open Ended Module</b>		<b>12</b>	
	1	Develop critical thinking and problem-solving skills by applying statistical methods in Economic theories		
	2	<b>Discussion</b> based on statistical tools		
	3	<b>Practical Assignments</b>		
	4	<b>Seminar</b>		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>ADVANCED MICROECONOMICS</b>				
Type of Course	<b>Major</b>				
Semester	V				
Academic Level	300-399				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Basic Economics Course of 0 – 99 level				
Course Summary	This course focuses on market on factor inputs, various aspects of general equilibrium and economic efficiency, the behaviour of consumers under uncertain conditions and basic concepts of behavioural economics.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	To understand the fundamental methods and theories of microeconomics	U	C	Instructor-created exams / Practical Assignment
CO2	Understand the functioning of factor markets.	U	C	Writing assignments / Quiz
CO3	To analyze the concept of general equilibrium and welfare analysis.	An	P	Observation of Practical Skills / Group Discussion
CO4	Apply microeconomic concepts to analyse real-life economic situations.	Ap	P	Observation of Practical Skills / Home Assignments
CO5	To evaluate consumer behaviour under uncertain conditions	E	P	Group Discussion / Instructor-created exams
CO6	Develop microeconomic models to evaluate real-world microeconomic phenomena and issues.	C	M	Practical Assignment Viva Voce
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C)				
# - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

**DETAILED SYLLABUS:**

<b>Module</b>	<b>Unit</b>	<b>Content</b>	<b>Hrs:</b>	<b>Marks</b>
<b>I</b>	<b>MARKET FOR FACTOR INPUTS</b>		<b>13</b>	<b>18</b>
	1	Competitive Factor Markets - Demand for a Factor input with a single variable input	3	
	2	Demand for a Factor input with a several variable inputs	3	
	3	Supply of inputs - Equilibrium	3	
	4	Factor markets with Monopoly Power	2	
	5	Factor markets with Monopsony Power	2	
<b>II</b>	<b>GENERAL EQUILIBRIUM AND ECONOMIC EFFICIENCY</b>		<b>15</b>	<b>20</b>
	6	Efficiency in Exchange - The Advantages of trade	2	
	7	Edgeworth Box Diagram - Efficient Allocations	2	
	8	Contract Curve - Economic Efficiency of Competitive Markets	2	
	9	Equity and Efficiency - The Utility Possibilities Frontier	2	
	10	Social Welfare Functions	2	
	11	Equity and Perfect Competition	1	
	12	Efficiency in Production - Input efficiency - Production Possibility Frontier - Marginal Rate of Transformation	3	
	13	Efficiency in Output Markets	1	
	<b>III</b>	<b>UNCERTAINTY AND CONSUMER BEHAVIOUR</b>		
14		Describing Risk- Probability- Expected Value – Variability -	1	
15		Preferences towards Risk – Risk Averse- Risk Neutral – Risk Loving	2	
16		Reducing Risk – Diversification – Law of Large Numbers – Actuarial Fairness	2	
17		The Value of Information	2	
18		Demand for Risky Assets – Trade-off between risk and return – Investor’s Choice Problem	3	
<b>IV</b>	<b>BEHAVIOURAL ECONOMICS</b>		<b>10</b>	<b>16</b>
	19	Reference Points and Consumer’s preferences	3	
	20	Endowment Effect – Loss Aversion – Framing- Fairness	3	
	21	Rules of Thumb and Biases in Decision making –	2	
	22	Anchoring – Rules of Thumb – Law of Small Numbers	2	
<b>V</b>	<b>Open Ended Module</b>		<b>12</b>	
	Discussion based on different market securities and its valuation.			
	Practical Assignments about firms’ decision making in calculating the worthiness of a capital investment.			

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>INTERNATIONAL TRADE THEORIES</b>				
Type of Course	<b>Major</b>				
Semester	V				
Academic Level	300 - 399				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Basic Microeconomics and Macroeconomics courses of 200 – 299 level				
Course Summary	This course explores the traditional, modern and new theories of international trade between nations and the relevance of international trade in an economy's development.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Understand the various concepts in international Trade	U	C	Instructor-created exams / Quiz
CO2	Analyze the traditional modern and new trade Theories	An	P	Practical Assignment
CO3	Evaluate the process of international transactions between nations	Ap	F	Seminar Presentation / Group Discussion
CO4	Apply the theoretical knowledge to current international trade and financial flows	Ap	C	Instructor-created exams / Home Assignments
CO5	Create complete understanding of the theoretical background of international trade and financial flows.	U	F	Viva
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Introduction to International Trade</b>		<b>12</b>	<b>17</b>
	1	Scope and Importance of international trade	2	
	2	Concepts in International Trade (Terms of trade, Gains from Trade, Production Possibility Frontier ,Trade indifference curve)	2	
	3	Free Trade, Protection and Tariff	2	
	4	Balance of payment	2	
	5	Foreign exchange.	2	
	6	Purpose of International Economic Theories	2	
<b>II</b>	<b>Traditional Theories of International Trade</b>		<b>11</b>	<b>17</b>
	7	Mercantilists views on trade	2	
	8	Absolute cost advantage	2	
	9	Comparative advantage theory	3	
	10	Opportunity cost theory	2	
	11	Reciprocal demand theory.	2	
<b>III</b>	<b>Modern Theories of International Trade</b>		<b>13</b>	<b>19</b>
	12	Offer curve	2	
	13	Heckscher Ohlin Theorem	3	
	14	Leontief Paradox	2	
	15	Factor Price equalization Theorem	2	
	16	Factor intensity reversals-Stolper –Samuelson Theorem	2	
	17	Rybczynski Theorem	2	
<b>IV</b>	<b>New Theories of International Trade</b>		<b>12</b>	<b>17</b>
	18	Technological gap model	2	
	19	Product cycle model	2	
	20	Kravis Theory of Availability	2	
	21	Intra industry Trade model of Paul Krugman	3	
	22	Neo Heckscher Ohlin Theory	3	
<b>V</b>	<b>Open ended module</b>		<b>12</b>	
		<b>Discussion</b> - compare and contrast traditional and modern theories of International trade		
		<b>Practical Assignments</b> -Study about the relevance of international trade theories in explaining current International transactions between countries.		
		<b>Seminar</b> - presentation about the evaluation of new trade theories in the context of international trade of developing nations like India.		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>GROWTH THEORIES IN ECONOMICS</b>				
Type of Course	<b>Major</b>				
Semester	V				
Academic Level	300 - 399				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-		60
Pre-requisites	Microeconomics and Macroeconomics course of 200 – 299 level				
Course Summary	This course delves into growth theory, focusing on coherent mathematical formalizations of economic growth. It explores various theories, from classical economists (such as Ricardo, Malthus, and Marx) to contemporary ideas about increasing returns, externalities, and the weightless economy.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO 1	Understand the process of economic growth	U	C	Instructor-created exams / Quiz
CO 2	Analyze the theoretical aspects of growth	An	P	Practical Assignment
CO 3	Evaluate various growth models	Ap	F	Seminar Presentation / Group Discussion
CO 4	Apply the theoretical knowledge into understanding the growth process	Ap	C	Instructor-created exams / Home Assignments
CO 5	Create complete understanding of the growth process	U	F	Viva
CO 6				
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>The concept of economic growth</b>		<b>10</b>	<b>15</b>
	1	Distinction between growth and development	3	
	2	Determinants of inclusive and sustainable growth	2	
	3	Measurements of economic growth	2	
	4	Characteristics and features of developing nations	3	
<b>II</b>	<b>Understanding growth models</b>		<b>12</b>	<b>18</b>
	5	Adam Smith,	2	
	6	David Ricardo	2	
	7	Karl Marx	2	
	8	Joseph Schumpeter	3	
	9	Harrod- Domer model	3	
<b>III</b>	<b>Advanced discussion on growth models</b>		<b>12</b>	<b>18</b>
	10	Robert Solow	3	
	11	Joan Robinson	2	
	12	Endogenous growth model – Paul Romer	2	
	13	Fei – Ranis model of economic growth	3	
	14	Unified growth theory	1	
	15	Justin Lin - New structural Economics	1	
<b>IV</b>	<b>Perspectives on economic growth</b>		<b>14</b>	<b>19</b>
	16	Balanced growth approach	2	
	17	Unbalanced growth approach	2	
	18	Convergence Theory	2	
	19	Human capital and economic growth-Schultz Model	3	
	20	Technical change and economic growth	2	
	21	Production function and economic growth	2	
	22	Structural changes and economic growth	1	
<b>V</b>	<b>Open ended module</b>		<b>12</b>	
		<b>Discussion</b> Growth experience of economies		
		<b>Practical Assignments</b> Study about the relevance of theories in explaining the growth experience of third world countries		
		<b>Seminar</b> present the student's understanding of growth using a particular economy's experience.		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Microeconomics and Macroeconomics course of 200 – 299 level				
Course Summary	This course explores important issues related to Development such as Poverty, Unemployment, Inequality and Inflation. The measurements of Development Issues are also incorporated the topics.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO 1	Help in understanding the major development issues faced by Indian Economy and its historical precedents.	U	C	Instructor-created exams / Group Discussion.
CO 2	Help in analysing the impact of public policy framed to deal with development issues such as Poverty, inequality in income distribution, unemployment and fiscal deficit.	An	F	Instructor-created exams/ Seminars/ Projects
CO 3	Help in evaluating the conceptual framework methodology, trends and policy measures adopted regarding the development issues	E	C	Seminar Presentation / Group Discussion
CO 4	After studying the development issues of Indian Economy, students will be exposed to economic reforms in India and problems of Indian economy	Ap	P	Instructor-created exams / Home Assignments
CO 5	Students will learn how to think critically about public policy issues and made capable of measuring poverty and unemployment in a small region	E	M	Writing assignments/ Group Discussions
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Historical Precedents of Development Issues of Indian Economy</b>		<b>6</b>	<b>9</b>
	1	History of development Issues of Indian Economy	2	
	2	Basic indicators of Development: Real income, Health and Education	1	
	3	Basic issues in economic development	1	
	4	Institutional framework and policy regimes	2	
<b>II</b>	<b>Poverty</b>		<b>14</b>	<b>20</b>
	5	Concepts of poverty- Absolute Measurement of Poverty, Relative measurement of Poverty, Multi - Dimensional Poverty	3	
	6	Poverty Estimation-Poverty Line Calculation- Consumption verses Income levels- Data collection Methods -URP, MRP	4	
	7	Multi-dimensional poverty index.	1	
	8	Post-Independence Poverty Estimation- Tendulkar Committee (2009) -Rangarajan Committee.	2	
	9	Trends of Poverty	2	
	10	Poverty Alleviation Programmes	1	
	11	Economic Characteristics of High- Poverty Groups	1	
	<b>III</b>	<b>Inequality</b>		
12		Income Inequalities in India -Causes of Income Inequalities in India	2	
13		Measurements of Inequality-Lorenz Curve- Gini coefficient	2	
14		The Ahluwalia- Chenery Welfare Index	2	
15		Trends of Inequality in India.	3	
16		Government Policy to tackle the problem of inequality	2	
17		Policy Options on Income Inequality and Poverty	2	
<b>IV</b>	<b>Unemployment:</b>		<b>15</b>	<b>22</b>
	18	Types and Structure of unemployment	3	
	19	Conceptual framework of key employment and unemployment indicators:	4	
	20	Nature and Estimates of Unemployment in India	3	
	21	Government Policy for Removing Unemployment	3	
	22	Major Employment Programmes	2	
<b>V</b>	<b>Open ended module</b>		<b>12</b>	
		<b>Discussion</b> based on the trends in fiscal deficit and inflation in India	3	
		A simple project for the Measurement of poverty using MRP method in a Ward of LSG	5	
		A simple project for the Measurement of Unemployment in the local territory using any one methodology	5	

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

**Report Based on Study Tour:** A study tour is recommended because it may add direct experience to learners about different economic culture of the country. All the students need to prepare a report of the tour that includes the places they visited, its importance etc and submit it to the Head of the Department soon after the completion of the tour.

Programme	B.A. Economics Honours				
Course Title	<b>ELEMENTARY ECONOMETRICS</b>				
Type of Course	<b>Major</b>				
Semester	VI				
Academic Level	300-399				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	3	-	2	75
Pre-requisites	1. Analytical Tools for Economics I of 200-299 level 2. Analytical Tools for Economics II of 200-299 level				
Course Summary	This course introduces students to the econometric methods used to conduct empirical analysis in Economics. The course is designed to provide the students with the basic econometric techniques needed to undertake applied research projects. It also provides the base for more advanced optional courses in econometrics.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	To Understand the methodology of Econometrics	U	C	Instructor-created exams / Quiz
CO2	To analyse linear models using ordinary least squares and make inferences about population parameters	An	P	Practical Assignment
CO3	To evaluate the elasticity, growth rates etc using econometric models	E	P	Seminar Presentation / Practical sessions
CO4	To detect econometric problems and apply remedial measures	E	P	Instructor-created exams / Home Assignments
CO5	Demonstrate econometric models and analysing skills by applying the acquired knowledge to address economic phenomena in the contemporary world. Forecasting using estimated models	Ap, C	F	Practical, Writing assignments
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Basic Principles of Economics</b>		<b>5</b>	<b>8</b>
	1	What is Econometrics? Methodology of Econometrics	2	
	2	Uses of Econometrics	1	
	3	Limitations of Econometrics	1	
	4	The concept of PRF -Significance of stochastic error term-The SRF	1	
<b>II</b>	<b>Simple linear regression model: Two variable case</b>		<b>12</b>	<b>19</b>
	5	Ordinary least square estimation of a linear model	2	
	6	Assumptions underlying the method of least squares	1	
	7	Properties of estimators - The Gauss Markov theorem	2	
	8	Goodness of fit	2	
	9	Testing of hypothesis - Confidence intervals	3	
	10	Forecasting	2	
<b>III</b>	<b>Other functional forms of regression models</b>		<b>12</b>	<b>19</b>
	11	Multiple linear regression model - Extension of the single explanatory variable case to a multivariate model(specification, interpretation of regression coefficients)	2	
	12	Multiple linear regression model- test of significance of partial regression coefficients, adjusted $R^2$	2	
	13	Regression through the origin	1	
	14	Introducing non-linearity through functions of explanatory variables -Double log Model	1	
	15	Semilog models	1	
	16	Reciprocal model	1	
	17	Dummy Variable regression models - ANOVA & ANCOVA models- specification & interpretation of regression coefficients	3	
	18	Dummy variable trap	1	
<b>IV</b>	<b>Violation of classical assumptions: consequences, detection and remedies</b>		<b>16</b>	<b>24</b>
	19	Multicollinearity- Nature, Practical Consequences, Detection methods: using $R^2$ and t values, auxiliary regressions, Remedial measures: combining cross sectional and time series, transformation of variables	4	
	20	Heteroscedasticity – Nature, Consequences, Detection methods: Park test, Spearman’s rank correlation test, White’s general heteroscedasticity test, Remedial measures: WLS method, using plausible assumptions about heteroscedasticity pattern	4	
	21	Autocorrelation - Nature, Consequences, Detection methods: the Run’s test, Durbin Watson d test, Remedial measures: GLS method	4	
	22	Specification Errors – Types, Consequences of underfitting and overfitting of model, Detection methods: DW d statistic, Ramsey’s RESET test, Lagrange multiplier test	4	

<b>V</b>	<b>Open Ended Module</b>	<b>30</b>	
	Estimation of economic functional relationships using cross section data, interpretation and forecasting (Excel package can be used for doing the regression)		

**Note:** The syllabus has five modules. There are 22 units in the first four modules composed of the theory topics. There are 45 instructional hours for the first four modules and 30 hrs for the final one. Module V is an open module designed to equip students with practical skill to analyse updated information on the contemporary world. The 10 marks for the evaluation of practical will be based on Module V. The end-semester examination for the theory part will be based on the 22 units in the first four modules.

Programme	B.A. Economics Honours				
Course Title	<b>ADVANCED MACROECONOMICS</b>				
Type of Course	<b>Major</b>				
Semester	VI				
Academic Level	300 - 399				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Intermediate Macroeconomics course of 200 – 299 level				
Course Summary	This course explores important concepts, theories, models and other fundamental macro aspects of economics.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Understand the important concepts of economics and its real-world applications.	U	C	Instructor-created exams / Quiz
CO2	Develop and practice the skill of thinking like an economist.	Ap	P	Practical Assignment / Observation of Practical Skills
CO3	Help the student master the macroeconomic aspects essential for understanding the economic climate, specific economic issues, and policy alternatives.	AN	P	Seminar Presentation / Group Discussion
CO4	Apply the macroeconomic perspectives and reason accurately and objectively about economic matters.	EV	C	Instructor-created exams / Home Assignments
CO5	To make the students curious about the functioning of the economy and the power and breadth of economics	C	F	Writing assignments
CO6	Demonstrate critical thinking and problem-solving skills by applying the acquired knowledge to address complex economic challenges in the contemporary world.	Ap	P	Viva Voce
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

**DETAILED SYLLABUS:**

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>The orthodox monetarist school</b>		<b>11</b>	<b>16</b>
	1	The quantity theory of money approach,	2	
	2	The expectations-augmented Phillips curve analysis,	3	
	3	The monetary approach to balance of payments theory and exchange rate determination,	3	
	4	The orthodox monetarist school and stabilization policy	3	
<b>II</b>	<b>The new classical school and the real business cycle school</b>		<b>12</b>	<b>18</b>
	5	The structure of new classical models,	1	
	6	Equilibrium business cycle theory,	2	
	7	The policy implications of the new classical approach,	3	
	8	The real business cycle school: Real business cycle theory, The structure of a real business cycle model,	3	
	9	A real business cycle aggregate demand and supply model,	2	
	10	The policy implications of real business cycle theory	1	
<b>III</b>	<b>The new Keynesian school</b>		<b>10</b>	<b>15</b>
	11	The fall and rise of Keynesian economics, New Keynesian economics,	3	
	12	Core propositions and features of new Keynesian economics, Nominal rigidities,	2	
	13	Dornbusch's overshooting model,	2	
	14	Real rigidities,	1	
	15	New Keynesian business cycle theory, Policy implications	2	
<b>IV</b>	<b>The new political macroeconomics</b>		<b>15</b>	<b>21</b>
	16	Political distortions and macroeconomic performance, Political influences on policy choice,	2	
	17	The role of government, Politicians and stabilization policy,	2	
	18	Alternative approaches to the 'political business cycle': an Overview,	2	
	19	The Nordhaus opportunistic model, The Hibbs partisan model,	2	
	20	The decline and renaissance of opportunistic and partisan models, Rational political business cycles,	2	
	21	Rational partisan theory, Opportunistic and partisan behaviour: a synthesis,	2	
	22	Politics, time inconsistency, credibility and reputation, Policy implications of politico-economic models	3	
<b>V</b>	<b>Open Ended Module</b>		<b>12</b>	
	1	Consumer theories after Keynes		
	2	Investment Theories		
	3	Theories of demand for money and supply of money		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks)

are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>TIME SERIES ECONOMETRICS</b>				
Type of Course	<b>Major</b>				
Semester	VII				
Academic Level	400-499				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	3	-	2	75
Pre-requisites	Econometrics course of 300-399 level				
Course Summary	This course introduces students to the econometric methods using time series data to conduct empirical analysis in Economics. The course is designed to provide the students with the basic econometric techniques needed to undertake applied research projects using macroeconomic time series data.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO 1	To Understand the basic concepts of Time series Econometrics	R,U	C	Instructor-created exams / Quiz
CO 2	To analyse dynamic econometric models	An	P	Instructor-created exams- Practical Assignment
CO 3	To understand and evaluate the stochastic processes	E	P	Seminar Presentation / Quiz /Practical sessions
CO 4	To analyse the models of stochastic processes	E	P	Instructor-created exams / Home Assignments
CO 5	To understand the nature of financial time series and apply the models to measure volatility	Ap	F	Writing assignments
CO 6	Forecasting using estimated models - Demonstrate econometric models and analysing skills by applying the acquired knowledge to address economic phenomena in the contemporary world.	C	P	Practical sessions/Viva Voce
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Dynamic Econometric Models</b>		<b>11</b>	<b>18</b>
	1	Role of Lags in Economics	1	
	2	Distributed Lag (DL) model, Autoregressive (AR) model and Autoregressive Distributed Lag (ARDL) model	2	
	3	The Koyck distributed lag model	2	
	4	Rationalisation of Koyck model (AE model)	2	
	5	Estimation of ARDL Model - Instrumental Variable Method	2	
	6	Almon Approach to Distributed lag model	2	
<b>II</b>	<b>Basic Concepts in Time Series Econometrics</b>		<b>16</b>	<b>22</b>
	7	Stochastic processes, Stationary processes, Purely random processes	1	
	8	Nonstationary stochastic processes – Random walk without drift, Random walk with drift	1	
		Unit root stochastic process, Integrated Process	2	
	9	Transforming nonstationary time series into stationary: Trend stationary process, Difference stationary stochastic processes	3	
	10	Tests of stationarity- ACF and correlogram,	2	
	11	Dickey Fuller and Augmented Dickey Fuller tests of stationarity	3	
	12	Cointegration, Cointegration Test, Error Correction Model	4	
<b>III</b>	<b>Modelling Stochastic Processes</b>		<b>12</b>	<b>18</b>
	13	AR, MA, ARMA and ARIMA models	2	
	14	The Box Jenkins methodology	3	
	15	Forecasting using estimated ARIMA model	1	
	16	Multivariate time series - VAR	1	
	17	Estimation of VAR and Forecasting with VAR	2	
	18	VAR and causality, Problems with VAR modelling	3	
<b>IV</b>	<b>Modelling Financial Time Series</b>		<b>6</b>	<b>12</b>
	19	Volatility Clustering in financial time series	1	
	20	ARCH model	2	
	21	GARCH model	1	
	22	Forecasting volatility in financial time series	2	
<b>V</b>	<b>Simultaneous Equation Models</b>		<b>30</b>	
		Examples for Simultaneous equation models- Simultaneous equation bias – Identification Problem- Estimation Approaches : Recursive model & OLS estimation, ILS, TSLS – Forecasting		

**Note:** The syllabus has five modules. There are 22 units in the first four modules composed of the theory topics. There are 45 instructional hours for the first four modules and 30 hrs for the final one. Module V is an open module designed to equip students to analyse simultaneous equations in macroeconomic models. The 10 marks for the evaluation will be based on Module V. The end-semester examination will be based on the 22 units in the first four modules.

Programme	B.A. Economics Honours				
Course Title	<b>GAME THEORY AND ECONOMIC BEHAVIOUR</b>				
Type of Course	Major				
Semester	VII				
Academic Level	400 - 499				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	3	-	2	75
Pre-requisites	Advanced Microeconomics course of 300 – 399 level				
Course Summary	The expected outcome is for students to gain a comprehensive understanding of game theory principles and their application in economics, fostering strong analytical, problem-solving, and policy evaluation skills essential for tackling real-world economic challenges.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Understand the theory of games	U	C	Instructor-created exams / Quiz
CO2	Analyze the decision making under interdependent situations	An	P	Practical Assignment
CO3	Evaluate different strategies	E	P	Seminar Presentation
CO4	Can predict the optimal strategies of players and how the players can exploit strategic situations for their benefit	Ap	P	Instructor-created exams / Home Assignments
CO5	The students can understand how to formulate different real-life situations as games	Ap	P	Viva

\* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C)  
 # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)

**DETAILED SYLLABUS:**

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Introduction to Game Theory</b>		<b>5</b>	<b>8</b>
	1	What is game theory?	1	
	2	History of game theory	1	
	3	Theory of rational choice	2	
	4	Interacting decision makers	1	
<b>II</b>	<b>Strategic Games and Nash Equilibrium</b>		<b>14</b>	<b>22</b>
	5	Strategic games: examples	3	
	6	Nash equilibrium: concept and examples	2	
	7	Best response functions	2	
	8	Dominated Actions	2	

	9	Symmetric games and symmetric equilibria	2	
	10	Illustrations of Nash equilibrium-Cournot and Bertrand's model of duopoly market	3	
<b>III</b>	<b>Mixed Strategy Equilibrium</b>		<b>15</b>	<b>23</b>
	11	Introduction	2	
	12	Strategic games with randomisation	2	
	13	Mixed strategy Nash equilibrium: concept and examples	2	
	14	Dominated Actions	2	
	15	Pure equilibria when randomization is allowed	3	
	16	Equilibrium in a single population	2	
	17	Formation of Players' beliefs	2	
<b>IV</b>	<b>Extensive Games with perfect information</b>		<b>11</b>	<b>17</b>
	18	Introduction to extensive games	2	
	19	Strategies and outcomes	2	
	20	Nash equilibrium- Subgame perfect Nash equilibrium	2	
	21	Backward induction	2	
	22	Illustrations of Extensive Games and Nash Equilibrium-Stackelberg model of duopoly markets	3	
<b>V</b>	<b>Open Ended Module</b>		<b>30</b>	
	1	Seminar on other examples like ; <i>Bach or Stravinsky, Matching Pennies the Stag Hunt</i> etc		
	2	Discussion on the importance of game theory in modern economy		
	3	Exercises- saddle point		

**Note:** The syllabus has five modules. There should be total 22 units in the first four modules together, composed of the theory topics. The number of units in the last module can vary. There are 45 instructional hours for the first four modules and 30 hrs for the final one. Module V is designed to equip students with practical skills. The 20 marks for the evaluation of practical will be based on Module V. Internal assessments (30 marks) are split between the practical module (20 marks) and the first four modules (10 marks). The end-semester examination for the theory part will be based on the 22 units in the first four modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>MACROECONOMIC MODELS AND MEASUREMENT</b>				
Type of Course	<b>Major</b>				
Semester	VIII				
Academic Level	400 - 499				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	3	-	2	75
Pre-requisites	Macroeconomics Course of level 300 – 399				
Course Summary	This course is a modern approach to macroeconomics by building macroeconomic models from microeconomic principles, consistent with the way that macroeconomic research is conducted today.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Allows deeper insights into economic growth processes and business cycles.	U	C	Instructor-created exams / Quiz
CO2	Integrates the study of macroeconomics with approaches in courses in microeconomics and in field courses in economics	Ap	P	Seminar Presentation / Group Discussion
CO3	Develop a comprehensive and broad perspective of what macroeconomic theory is today	U	P	Seminar Presentation / Group Discussion
CO4	Apply macroeconomic models and tools in specific contexts and to particular problems	E	P	Instructor-created exams / Home Assignments
CO5	Construct models suitable for specific contexts	C	F	Practical Assignment / Observation of Practical Skills
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
I	<b>Measurement Issues in Macroeconomics</b>		<b>13</b>	<b>20</b>
	1	Macroeconomic Models	2	
	2	Microeconomics Principles behind Macroeconomic Models	2	
	3	Disagreements in Macroeconomics	2	
	4	What do we learn from Macroeconomic Analysis	2	
	5	<b>Labour Market measurement:</b> unemployment rate, participation rate, employment/population ratio	2	
	6	<b>Business cycle measurement:</b> Regularities in GDP Fluctuations, Co-movement among economic time series, co-movements between the price level and real GDP and between the inflation rate and real GDP, co-movements among labor market variables and real GDP	3	
II	<b>Closed Economy One Period Macroeconomic Model</b>		<b>12</b>	<b>18</b>
	7	Competitive equilibrium	2	
	8	Optimality	2	
	9	Sources of social inefficiency	2	
	10	Effects of change in government purchases	2	
	11	Effects of change in total factor productivity	2	
	12	Effects of a distorting labour income tax	2	
III	<b>Two Period Model of Consumption-Savings Decision</b>		<b>11</b>	<b>18</b>
	13	Two Period Model of the Economy	2	
	14	The Consumer's Lifetime Budget Constraint	1	
	15	The Consumer's Preferences	1	
	16	Consumer Optimization	1	
	17	How the consumer responds to changes in his or her current income, future income, and the market real interest rate	2	
	18	Competitive equilibrium	2	
	19	The Ricardian Equivalence Theorem	2	
IV	<b>Money, Banking, Prices and Monetary Policy</b>		<b>9</b>	<b>14</b>
	20	Monetary Intertemporal Model – Fisher relation – Competitive equilibrium	3	
	21	Money neutrality in the monetary intertemporal model.	3	
	22	Conventional Monetary Policy, the Liquidity Trap, and Unconventional Monetary Policy	3	
V	<b>Construction of Macroeconomic Models with reference to Indian Economy</b>		<b>30</b>	
		Practical assignments to measure labour market related concepts in India		
		Presentation of macroeconomic model constructed in Indian		

		context		
		Group discussions on social inefficiency		
		Debate: Conventional Vs Unconventional Monetary Policy		

**Note:** The syllabus has five modules. There should be total 22 units in the first four modules together, composed of the theory topics. The number of units in the last module can vary. There are 45 instructional hours for the first four modules and 30 hrs for the final one. Module V is designed to equip students with practical skills. The 20 marks for the evaluation of practical will be based on Module V. Internal assessments (30 marks) are split between the practical module (20 marks) and the first four modules (10 marks). The end-semester examination for the theory part will be based on the 22 units in the first four modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

	12	Welfare Maximization	2	
	13	Individualistic Social Welfare Functions	2	
<b>III</b>	<b>Externalities</b>		<b>10</b>	<b>15</b>
	15	Quasilinear Preferences and the Coase Theorem	3	
	16	Production Externalities	3	
	17	Market Signals	2	
<b>IV</b>	<b>Asymmetric Information</b>		<b>10</b>	<b>15</b>
	19	The Market for Lemons, Quality Choice, Adverse Selection	4	
	20	Moral Hazard, Moral Hazard and Adverse Selection	3	
	21	Signalling	2	
<b>V</b>	<b>Application of Microeconomic Theories in India</b>		<b>12</b>	
		<b>Discussion</b> based on welfare effects of pollution and environmental degradation in India		
		<b>Practical Assignments</b> on calculation of producer and consumer welfare in a given market		
		<b>Seminar</b> on how changes in policy alter the market equilibrium and impact social welfare		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>HETERODOX ECONOMICS</b>				
Type of Course	<b>Major</b>				
Semester	VIII				
Academic Level	40 <sup>a</sup> – 499				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Advanced economic course on Microeconomics, Macroeconomics and Development Economics of 300 – 399 level				
Course Summary	This course intends to provide an alternative perception to the economic theories, principles and concepts.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	To understand the alternative approach to economics	U	C	Instructor-created exams / Practical Assignment
CO2	Understand the various theories of value and the heterodox theories of distribution.	U	C	Assignments / Quiz
CO3	To discern the micro-macro links from the perspective of heterodox economics.	Ap	P	Observation of Practical Skills / Group Discussion
CO4	To view aggregation problems from a different perspective and redefine welfare accordingly	Ap	P	Observation of Practical Skills / Home Assignments
CO5	Use systemist framework to evaluate real-world economic problems and issues.	E	P	Group Discussion / Instructor-created exams
CO6	To explore feminist, ecological and radical discourses.	E	P	Group Discussion / Practical Assignment Viva Voce
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>A Heterodox View of the Economy</b>		<b>8</b>	<b>12</b>
	1	What is heterodox economics?	1	
	2	Evolution of heterodox economics	2	
	3	From classical political economy to neoclassical economics	1	
	4	From classical political economy to heterodox economics	1	
	5	Heterodox economic theory and the social provisioning process.	3	
<b>II</b>	<b>Module 2: Heterodox Theories of Value</b>		<b>10</b>	<b>14</b>
	6	Theory of Value by Adam Smith	2	
	7	Ricardo's conception of value	2	
	8	Marxian approach to value	2	
	9	Sraffa's approach	4	
<b>III</b>	<b>Module 3: Heterodox Theories of Distribution</b>		<b>15</b>	<b>22</b>
	10	Recent developments in heterodox theories	3	
	11	Classical and Marxian theory	3	
	12	Cambridge theory	2	
	13	Neo-Kaleckian theory	2	
	14	The functional-size distribution nexus - Different sectors and different classes	2	
	15	Econo-physics and the 'two-class theory of income distribution'	3	
<b>IV</b>	<b>Module 4: Micro- Macro link in Heterodox Economics</b>		<b>15</b>	<b>22</b>
	16	Aggregates and aggregation in science	2	
	17	<i>A heterodox perspective on the micro-macro link: The whole is more than the sum of its parts</i>	3	
	18	Relations matter: There is real novelty	2	
	19	Aggregation and Welfare	2	
	20	Systemism as a general frame work	2	
	21	Systemism and heterodoxy - key ideas and concepts	2	
	22	Heterodox economics in a systemist framework	2	
<b>V</b>	<b>Open Ended Module</b>		<b>12</b>	
		Discussion based on Feminist Economics, Ecological Economics and Radical Economics		
		Seminars to discuss and evaluate the state of affairs and policy related to women and ecology.		
		Group discussion and Assignments to understand radical economics.		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22

units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>METHODS FOR QUANTITATIVE RESEARCH IN ECONOMICS</b>				
Type of Course	<b>Major</b>				
Semester	VIII				
Academic Level	400 - 499				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-		60
Pre-requisites	Economics course of 300 – 399 level				
Course Summary	This course provides a comprehensive foundation in research design and statistical analysis techniques for economic research, covering topics such as research methodology, data collection methods, statistical analysis, software applications, and advanced topics including regression analysis and econometrics, with a focus on ethical considerations throughout the research process.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Demonstrate a solid understanding of the fundamental principles of research design, including different types of research methodologies and sampling techniques.	U	F	Instructor-created exams / Quiz
CO2	to apply various statistical analysis techniques, such as hypothesis testing, regression analysis, and econometric methods, to real-world economic research problems	Ap	P	Practical Assignment
CO3	critically analyze research problems, identifying gaps in existing literature, formulating meaningful research questions, and selecting appropriate research designs to address these questions.	E	F	Seminar Presentation / Group Discussion
CO4	Synthesize information from various sources, including primary and secondary data, to create well-constructed and logically organized research proposals and projects.	Ap	P	Instructor-created exams / Home Assignments
CO5	Evaluate the reliability and validity of research findings, interpret statistical results, and communicate their research effectively through written reports and presentations. They will also.	E	C	Instructor-created exams / Home Assignments
CO6	Create comprehensive research projects that demonstrate a mastery of quantitative research	Ap	P	

methods in the field of economics			
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)			

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Foundations of Research Design</b>		<b>12</b>	<b>18</b>
	1	Introduction to Research Methodology - Definition and importance of research	2	
	2	Types of research- exploratory, descriptive, explanatory	1	
	3	Research Problem Formulation: Literature review - Identifying research gaps - Developing research objectives and hypotheses	2	
	4	Research Design and Types - Experimental vs. non-experimental designs - Cross-sectional vs. longitudinal designs - Quasi-experimental designs	3	
	5	Sampling Techniques - Probability and non-probability sampling methods- Sample size determination	3	
	6	Sampling errors and biases	1	
<b>II</b>	<b>Data Collection Methods</b>		<b>12</b>	<b>16</b>
	7	Survey Research - Questionnaire design and construction -	2	
	8	Sampling in surveys – Pilot survey - Survey administration and data collection	3	
	9	Validity and Reliability – Test of Validity and reliability	2	
	10	Randomized control trials - Experimental and control groups	2	
	11	Secondary Data - Utilizing existing datasets	2	
	12	Ethical considerations in data collection	1	
<b>III</b>	<b>Statistical Analysis Techniques</b>		<b>12</b>	<b>18</b>
	13	Descriptive Statistics - Frequency distributions - Graphical representation of data	3	
	14	Inferential Statistics - Hypothesis testing- Confidence intervals - t-tests, ANOVA, ANCOVA,	3	
	15	Correlation Regression analysis.	2	
	16	Data Interpretation - Communicating statistical findings effectively - Presentation: Creating visualizations and tables	4	
<b>IV</b>	<b>Software Applications and Advanced Topics</b>		<b>12</b>	<b>18</b>
	17	Introduction to Statistical Software - Familiarisation of software like R /Python/SPSS	3	
	18	Data import, cleaning and basic analysis	1	
	19	Advanced Regression Analysis - Multiple regression - Logistic regression Model diagnostics	3	
	20	Econometrics in Economic Research - Time-series analysis	2	
	21	Panel data analysis- Instrumental variable methods.	2	

	22	Research ethics.	1	
<b>V</b>	<b>Open Ended Module</b>		<b>12</b>	
		<b>Discussion:</b> Identify a research paper (Qualitative research work)		
		<b>Practical Assignments:</b> Review of various research works and identify different research methods		
		<b>Seminar:</b> Prepare a research proposal and present it		

Note: The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>METHODS FOR QUALITATIVE RESEARCH IN ECONOMICS</b>				
Type of Course	<b>Major</b>				
Semester	VIII				
Academic Level	400 - 499				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Economics course of 300 – 399 level				
Course Summary	This course provides a comprehensive overview of qualitative research methods in economics, covering topics such as philosophical foundations, research design, sampling, data collection techniques, analysis techniques, interpretation, and advanced topics including ethical considerations and the integration of qualitative methods with big data approaches.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Articulate the philosophical foundations of qualitative research, distinguishing between post-positivism, critical realism, and constructivism.	U	F	Instructor-created exams / Quiz
CO2	Conduct data analysis skillfully, through advanced approaches like discourse analysis and ethnographic content analysis, synthesizing information from diverse sources.	An	P	Practical Assignment
CO3	Critically evaluate ethical challenges in advanced qualitative research designs and assess the strengths and limitations of various qualitative methods.	E	F	Seminar Presentation / Group Discussion
CO4	Proficiently design and justify complex qualitative research studies utilizing advanced methodologies such as multi-method approaches and case studies.	Ap	P	Instructor-created exams/ Home Assignments
CO5	Produce an original publishable-quality research paper, creatively applying emerging trends in qualitative research, including big data and digital ethnography.	Ap	F	Instructor-created exams / Home Assignments

\* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C)

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	
<b>I</b>	<b>Introduction to Qualitative Research in Economics</b>		<b>16</b>	<b>22</b>
	1	Overview of Research Methods – Quantitative and qualitative strength and limitations of Qualitative research.	2	
	2	Philosophical Foundations - Understanding ontology and epistemology in qualitative research - Positivism - constructivism – Critical realism	3	
	3	Review of literature	2	
	4	Formulation of research problem - Identification conceptualization and operationalization of the problem	3	
	5	Research Design in Qualitative Research - Defining research questions and objectives	3	
	6	Choosing appropriate qualitative research designs - Case study, grounded theory, ethnography, and phenomenology	3	
<b>II</b>	<b>Sampling and Data Collection Techniques in Qualitative Research</b>		<b>12</b>	<b>18</b>
	7	Sampling methods: Purposeful sampling technique- Snowball sampling - Critical case sampling-Theoretical sampling.	3	
	8	Data collection methods: In-Depth Interviews - Focus Group Discussions - Observation	3	
	9	Document Analysis -Examining primary and secondary sources	2	
	10	Multi method approach	2	
	11	Case study approach	2	
<b>III</b>	<b>Data Analysis in Qualitative Research</b>		<b>10</b>	<b>15</b>
	12	Techniques: Thematic analysis - Content analysis - Constant comparative analysis	2	
	13	Coding and categorization - Discourse analysis - Narrative analysis.	2	
	14	Scaling Techniques: Likert Scale – Thurstone scale – Guttman scale	2	
	15	Introducing Qualitative Data Software	2	
	16	Interpretation and Writing	2	
	17	Hermeneutics. The role of theory in qualitative research in economics	2	
<b>IV</b>	<b>Advanced Topics in Qualitative Research in Economics</b>		<b>10</b>	<b>15</b>
	18	Recent trends and issues in Qualitative research	2	
	19	Power Dynamics And reflexivity	2	
	20	Big data and qualitative Research methods	2	
	21	Ethical considerations specific to qualitative research.	2	
	22	Evaluating the impact of economic policies	2	
<b>V</b>	<b>Open ended module</b>		<b>12</b>	
		<b>Discussion:</b> Identify a research paper (Qualitative research work)		

		<b>Practical Assignments:</b> Preparation of interview Shedule/ questionnaire	
		<b>Seminar:</b> Review a research paper and present it	

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. *Elective Courses in Economics*

---

Programme	B.A. Economics Honours				
Course Title	<b>GENDER ANALYSIS IN ECONOMICS</b>				
Type of Course	<b>Elective</b>				
Semester	V				
Academic Level	300-399				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Basic Economics Course of 200 – 299 level				
Course Summary	This course provides a detailed understanding of gender equality, gender empowerment strategies, and social security policies that promote gender well-being.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Understand the basic concepts of gender and gender economics and to recognise the gender mainstreaming initiatives.	U	C	Instructor-created exams / Quiz/Assignment
CO2	Examine the peculiarities, role and challenges of gender in the labour market participation	E	C	Instructor-created exams / Practical Assignment / Observation of Practical Skills
CO3	Analyse the basic tools of gender Economics	An	P	Instructor-created exams / Seminar Presentation / Group Discussion
CO4	Develop the attitude and ability to preserve the concept of women empowerment and gender equality in the society.	Ap	P	Instructor-created exams / Home Assignments
CO5	Suggest and practice certain measures for protecting gender equality and gender well being	Ap	P	Writing assignments/Survey/Debate
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Introduction to Gender Economics</b>		<b>12</b>	<b>17</b>
	1	Concepts of gender and sex-Femininity and masculinity	1	
	2	Definition and Scope of Gender Economics	1	
	3	Historical Milestones of Gender Mainstreaming - Global perspective (UNDP measures, UN SDGs, CEDAW etc)	2	
	4	Gender Main streaming efforts in India-73 <sup>rd</sup> and &74 <sup>th</sup> amendments of Indian constitution, Gender budgeting, Beti Bachao Beti Padhao, Mahila Shakti Kendra, The National Crèche Scheme, Pradhan Mantri Matru Vandna Yojna, Pradhan Mantri Ujjwala Yojana, Sukanya Samridhhi Yojna (SSY), Skill Upgradation & Mahila Coir Yojna etc.	3	
	5	Gender mainstreaming efforts of Local self-government- WCP, GRC, Jagratha Samithi, Kudumbasree,etc.	1	
	6	Transgender policy of India and Kerala	1	
	7	Demography of female population in India-Age structure, mortality rates, Inter-state variations in sex ratio, Causes of declining sex ratio, Measurement of fertility and its control	3	
<b>II</b>	<b>Gender and Labour Market</b>		<b>12</b>	<b>17</b>
	8	workforce participation across Gender –Basic Statistics (world &India), Contribution of Claudin Goldin-U shape Curve	3	
	9	Challenges in informal and Formal Economy–Gender Discrimination and Exploitation in the Labour Market	2	
	10	Time use and Indian Time Use survey (1999-2000& 2019) for assessing women’s labour at home and workplace	3	
	11	Women’s Contribution to National Economy in terms of sectoral shares in GDP and employment	2	
	12	Impact of technology and modernization on women’s work participation	1	
	13	Effects of globalization and liberalization on women	1	
<b>III</b>	<b>Tools for Gender Economics</b>		<b>10</b>	<b>15</b>
	14	Gender Planning-Definition, importance, process and stakeholders	3	
	15	Gender Budgeting: Definition, Importance, process and stakeholders	3	
	16	Gender Auditing: Definition, Importance and process	4	
<b>IV</b>	<b>Tools for Women Empowerment</b>		<b>14</b>	<b>21</b>
	17	Women and education- GER ratio in India -Addressing gender inequalities in education	3	
	18	Gender equity in health-access to nutrition	2	
	19	Women’s participation in decision making	2	
	20	Gender equity in Assets -Protection of property rights	2	
	21	Crimes against women in India-Basic statistics	3	
	22	Schemes for safety net for women	2	
<b>V</b>	<b>Open Ended Module</b>		<b>12</b>	
	1	Perform Gender auditing of a leading institution		
	2	Discuss the reasons for increasing women crimes in Kerala		

	3	Gender-based discrimination in assets: carry out a local survey		
	4	Student led seminar on national and international laws for women's rights		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>ENVIRONMENT AND SUSTAINABLE DEVELOPMENT</b>				
Type of Course	<b>Elective</b>				
Semester	V				
Academic Level	300 – 399				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Economics Course of 200 – 299 level				
Course Summary	This course explores the relationship between environment and economy and through which students put forward various sustainable development models				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Understand the concept of environmental economics and its importance	U	C	Instructor-created exams / Quiz
CO2	Analyze various theories on environmental economics and related concepts	Ap	P	Practical Assignment / Observation of Practical Skills
CO3	Evaluate the problem of pollution	U	P	Seminar Presentation / Group Discussion
CO4	Apply the theoretical knowledge in reducing environmental degradation	Ap	C	Instructor-created exams / Home Assignments
CO5	Assess various environmental issues	U	F	Writing assignments
CO6	Create/ suggest various sustainable development models	Ap	P	Visiting and writing reports
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

DETAILED SYLLABUS:

Unit	Content	Hrs	Marks	
<b>I</b>	<b>Environment and Economy</b>		<b>12</b>	<b>17</b>
	1	The Environment and Economy- meaning and scope of environmental economics-	3	
	2	Major environmental problems, types of pollutions, Global warming and Ozone depletion.	3	
	3	The environmental Kuznet curve-	3	
	4	Limit to growth theory- Green GDP	3	
<b>II</b>	<b>Externalities and Regulations</b>		<b>15</b>	<b>22</b>
	5	Market failure and causes	2	
	6	Kinds of Externalities	1	
	7	Negative externalities and inefficiency	1	
	8	Positive externalities and inefficiency	1	
	9	Regulating externalities -prices- Fixing Emission standard and Emission Fees, Tradeable emission permits, recycling	4	
	10	Pigouvian taxes	1	
	11	Optimum level of pollution control	2	
	12	Property rights and Coase Theorem	3	
<b>III</b>	<b>Measuring Environmental Values</b>		<b>10</b>	<b>15</b>
	13	Environmental impact assessment- preventive expenditure technique- replacement cost technique- travel cost method-contingent valuation	4	
	14	National income accounting for the environment	2	
	15	The harvesting of renewable resources and maximum sustainable yield	2	
	16	Non-renewable resources and optimal depletion	2	
<b>IV</b>	<b>Sustainable Development</b>		<b>11</b>	<b>16</b>
	17	Sustainable development: concepts and practices- measurement	4	
	18	Earth summits	1	
	19	Sustainable developmental goals	1	
	20	Agenda 21	1	
	21	Sources and use of non-conventional and renewable energy	2	
	22	Organic farming	2	
<b>V</b>	<b>Open ended Module</b>		<b>12</b>	
		Report on waste management by visiting local dumping yards of the local self-governments- report should contain the assessment and measurement of pollution- suggestion to reduce the problems related to waste management. or Visit organic farm houses and make report on its economic side		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed

modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, is only for the external examination.

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Introduction to sources of data</b>		<b>15</b>	<b>22</b>
	1	An introduction to the role of data in economic history-the physiocrats- Quesnay- Hume- William Petty- Kuznets	5	
	2	Modern data sources	2	
	3	Scale of measurement	2	
	4	Data transformations; level v/s growth rates	2	
	5	Sources of data	1	
	6	Data reporting delay	1	
	7	Length of data	1	
	8	Accuracy of data	1	
<b>II</b>	<b>India's specific data sources</b>		<b>15</b>	<b>22</b>
	9	The role of National Sample Survey Organisation	1	
	10	Central statistical organization	1	
	11	Annual Survey of Industries	1	
	12	RBI- Handbook of Statistics on Indian Economy	2	
	13	SEBI handbook of statistics	2	
	14	Data set- Employee Provident Fund Organization	2	
	15	Ministry of Corporate affairs	2	
	16	Database on Indian economy - Census dataset- open government data platform in India	2	
17	National family health survey	2		
<b>III</b>	<b>Global data sources</b>		<b>8</b>	<b>12</b>
	18	UN data- monthly -Monthly bullets of statistics-SDG indicators- UN comtrade data base-UN conference on trade and development- Climate change indicators- dashboard	4	
	19	International financial statistics- financial access survey- government finance statistics- the World bank data catalogue- the global index data base- Federal Reserve economic data base (FRED)	4	
<b>IV</b>	<b>Case studies and controversies</b>		<b>10</b>	<b>14</b>
	20	The minimum wage controversy-the backward bending supply curve for labour- GDP calculation-Inflation Calculation-Purchasing Power Parity calculations	4	
	21	Reinhart-ROGOFF controversy- public data manipulation	3	
	22	Greece's public deficit figures-controversies about Argentina's inflation statistics- the Brazilian fiscal pedaling- limitations of publicly available data (case studied of relevant economies)	3	
<b>V</b>	<b>Open ended module</b>		<b>12</b>	
		<b>Discussion</b> on reliability of data from different sources		
		<b>Practical Assignments</b> to extract data from various sources		
		<b>Seminar</b> on the influence and value of data-based evaluation of different schemes, situations and problems		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22

units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>ECONOMICS OF LABOUR MARKET</b>				
Type of Course	<b>Elective</b>				
Semester	V				
Academic Level	300 - 399				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-		60
Pre-requisites	Course on Microeconomics and Macroeconomics of level 200 - 299				
Course Summary	This course explores the intricate dynamics of labour markets, providing students with a comprehensive understanding of the functioning of labour markets, and covering fundamental concepts, historical development, labour market outcomes and contemporary issues.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Understand the basic concept of labour economics, labour markets and labour force participation.	U	C	Instructor-created exams / Quiz
CO2	Analyze theories of labour supply, labour demand and wage discrimination	An	P	Practical Assignment
CO3	Evaluate wage determination in different market conditions and the impact of labour unions	E	F	Seminar Presentation / Group Discussion
CO4	Apply the theories and contribute to better labour market outcomes.	Ap	P	Instructor-created exams / Home Assignments
CO5	Create critical thinking on labour unions, collective bargaining and Govt Employment Programmes	Ap	F	Viva Voce
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Labor Market and Labour Supply</b>		<b>10</b>	<b>14</b>
	1	Labour Market and the Economy - Unique features of Labour market	1	
	2	Evolution of Labour Market Theory-Labour market Process.	2	
	3	Labour Supply-The Theory of Labour/Leisure Choice-Income taxes and Labour supply	2	
	4	Supply of Salaried and Contract Labourers- Labour Supply Curve.	2	
	5	Labour Force Participation - Its Measurement - Convergence of Participation Rates	3	
<b>II</b>	<b>Labour Demand</b>		<b>15</b>	<b>23</b>
	6	Demand for Labour in the Short Run -Marginal Productivity Theory of Labour Demand with its criticisms	3	
	7	Product Demand and Labour Demand	1	
	8	Short-run Equilibrium in Labour Demand	2	
	9	Elasticity of Demand for Labour	3	
	10	Demand for Labour in the Long Run- Long Run Equilibrium	2	
	11	Determinants of Elasticity of Labour Demand - Technological Change and Labour Demand	4	
<b>III</b>	<b>Wage Determination, Wage Differential and Discrimination</b>		<b>15</b>	<b>23</b>
	12	Wage Determination in Competitive Markets-Law of One Wage	1	
	13	Wage Determination in Monopsony Market	1	
	14	Minimum wage	1	
	15	Efficiency wage Theory	2	
	16	Compensating Wage Differentials	1	
	17	Hedonic Theory of Compensating Wage Differentials	1	
	18	Economics of Employee Benefits	1	
	19	Issues of Occupational Segregation-Duncan Index	3	
	20	Discrimination in the Labour Market-Theories of Labour Market Discrimination -Measurement of Discrimination.	4	
<b>IV</b>	<b>Union Membership and Collective Bargaining</b>		<b>8</b>	<b>10</b>
	21	Type of Labour Unions- The Determinants of Union Membership: Demand and Supply Model -Equilibrium level of Union Membership.	4	
	22	The Union-Management Bargaining Process-Contract	4	

		Zone-Union and Employer Reaction Function-Bargaining Process Outcomes		
<b>V</b>	<b>Open ended module</b>		<b>12</b>	
		<b>Discussion:</b> Measurement, Types of Unemployment and Causes of Unemployment		
		<b>Practical Assignments</b> on Unemployment Statistics of India and Kerala		
		<b>Seminar</b> on Government Employment Programmes		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>INTRODUCTION TO HEALTH ECONOMICS</b>		<b>12</b>	<b>19</b>
	1	Definition and scope of health economics	1	
	2	Significance of Health Economics	1	
	3	Essential features of health economics	1	
	4	health indicators-mortality, morbidity, birth rate, death rate, IMR, CMR, MMR, Disability Adjusted Life year (DALY), Quality Adjusted Life Year (QUALY)	5	
	5	Sex ratio	1	
	6	Value of life; Determinants of good health	1	
	7	Measurement of health status.	2	
<b>II</b>	<b>SUPPLY AND DEMAND FOR HEALTH CARE</b>		<b>15</b>	<b>23</b>
	8	Demand and Supply of health care	1	
	9	Characteristics of demand and supply of health	1	
	10	Demand for health and demand for medical care.	3	
	11	Nature of demand for health- Determinants of demand for health	2	
	12	Supplier induced demand; health as a form of capital.	3	
	13	Supply of health care-Determinants of supply of health care	2	
	14	Pricing of health care.	3	
<b>III</b>	<b>MARKET FOR HEALTH INSURANCE</b>		<b>10</b>	<b>14</b>
	15	Economics of health insurance- Demand for health insurance	1	
	16	setting insurance premium	1	
	17	Insurance concepts -Co-payments. Co-insurance rates, deductibles. Method of pricing insurance;	3	
	18	Health insurance challenges: Information asymmetry – Adverse selection -Moral hazard;	3	
	19	Private vs social health insurance.	2	
<b>IV</b>	<b>ECONOMIC EVALUATION OF HEALTH INTERVENTIONS</b>		<b>11</b>	<b>14</b>
	20	Evaluating Health Intervention- Direct and indirect costs of healthcare	2	
	21	Issues in the measurement of cost; Purpose and methods of evaluating a health intervention	4	
	22	Health policy of WHO - National health policy- NRHM- Health as a State subject.	5	
	<b>Open Ended Module</b>		<b>12</b>	
<b>V</b>	1	An overview of the health scenario in India and Kerala		
	2	Indian health care sector; Health Scenario in India and Kerala- issues – Kerala model of health.		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

	18	Non-parametric method and their application	2	
	19	Migration and regional economic growth	3	
	20	Demographic characteristics and economic growth	2	
	21	Economic Policy and Human capital	2	
	22	Human Capital and Development experiences of Kerala	1	
<b>V</b>	<b>Open Ended Module</b>		<b>12</b>	
		Assignments, Empirical studies, Problem Discussion		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

	4	4	-		60
Pre-requisites	Basic Economics Course of 200 – 299 level				
Course Summary	This course delves into the functioning and intricacies of financial markets, providing students with a comprehensive understanding of fundamental concepts, financial instruments, market structures, and services.				

## COURSE OUTCOMES (CO):

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Understand the basic concepts of financial markets, financial instruments, and financial services.	U	C	Instructor-created exams / Quiz
CO2	Analyze theories of market efficiency, investment strategies, and risk management.	An	P	Practical Assignment
CO3	Evaluate the impact of market regulations, financial intermediaries, and technological advancements on financial markets.	E	F	Seminar Presentation / Group Discussion
CO4	Apply financial theories and concepts to analyze market trends, make investment decisions, and manage financial risks.	Ap	P	Instructor-created exams / Home Assignments
CO5	Foster critical thinking on financial market reforms, corporate governance, and ethical considerations in finance.	Ap	F	Viva Voce

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>An Introduction to Indian Financial System</b>		<b>10</b>	<b>12</b>
	1	Financial System- definitions- functions	1	
	2	Key elements of well-functioning financial system	2	
	3	Formal and Informal financial sectors in India - Structures	2	
	4	Components of Formal Financial Sector in India -	1	
	5	Financial Institutions-	1	
	6	Financial Markets	1	
	7	Financial Instruments - Financial services	1	
	8	Components of Informal financial sector in India	1	
<b>II</b>	<b>Indian Financial System - An Overview</b>		<b>15</b>	<b>24</b>
	9	Phase I - Pre 1951 Organisation	2	
	10	Phase II - 1951 to mid-eighties	3	
	11	Phase III - Post Nineties	2	
	12	Economic Reforms	2	
	13	Financial Sector Reforms	3	
	14	Committees and Recommendations	3	
<b>III</b>	<b>Money Market in India</b>		<b>15</b>	<b>24</b>
	15	Money Market - Definition- Functions	1	
	16	Role of Reserve Bank of India-	2	
	17	Steps to develop Money Market in India	1	
	18	Money Market Instruments - T-Bills, Commercial Papers, Commercial Bills, Certificates of Deposits- Call/Short Notice Money- Collateralised Borrowing and Lending Obligation (CBLO)	5	
	19	Tools for managing liquidity in Indian Money Market- Reserve Requirements, Interest rates, Prime Lending rate, Bank rate, Refinance from RBI, Liquidity Adjustment Facility, Repos	6	
<b>IV</b>	<b>Capital Market in India</b>		<b>8</b>	<b>10</b>
	20	Capital Market - Definition- Functions - Components - Capital Market Instruments - History of Indian Capital Market - Reforms in Indian Capital Market	3	
	21	Primary Market and Secondary Market - Instruments, Methods of raising capital, Role of Stock Exchanges - BSE and NSE, Trading Mechanism in Stock Exchanges	3	
	22	Derivative Market – Instruments	2	
<b>V</b>	<b>Open ended module</b>		<b>12</b>	
		Discussion: Stock Indices in India and its Calculations		
		Practical Assignments on Leading companies of India		

		and Kerala		
		Seminar on how to participate in Online Trading in Indian Capital Market		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>DEMOGRAPHY</b>				
Type of Course	Elective				
Semester	VI				
Academic Level	300-399				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Economics Course of 200 – 299 level				
Course Summary	The course covers the dynamics of population growth, theoretical aspects of population, demographic data sources, empirical and policy implications of demographic issues in a developing country like India.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Understand the basic concepts, theories, policies and data sources of demography	U	C	Instructor-created exams / Quiz
CO2	Analyse the population dynamics with respect to fertility, mortality, nuptiality, migration and urbanisation	An	p	Instructor-created exams/ Practical Assignment /
CO3	Examine the age and sex composition of population in developed and less developed countries	E	C	Instructor-created exams/ Seminar Presentation / Observation of Practical Skills
CO4	Evaluate the effectiveness of India's current population policy in addressing the country's demographic challenges.	E	C	Instructor-created exams / Group Discussion Home Assignments/
CO5	Equip the students with practical skills needed to interpret contemporary demographic issues and to frame suitable demographic policies	C	P	Writing assignments/Group Discussion/ Viva Voce
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Introduction to Demography</b>		<b>12</b>	<b>17</b>
	1	Nature and scope of population studies, population studies and Demography	1	
	2	Interrelation between Population studies and other Disciplines	1	
	3	Development of population studies	2	
	4	Theories of Population Malthusian Theory, Optimum theory of population and theory of demographic transition	4	
	5	Sources of demographic data in India- Census, Civil Registration System, National Sample Survey, Demographic Survey – National Family Health survey (Recent report in detail)	4	
<b>II</b>	<b>Population Dynamics</b>		<b>16</b>	<b>23</b>
	6	Fertility- Meaning, Fecundity and fertility, sterility, Natural fertility, Factors affecting fertility.	2	
	7	Basic measures of Fertility: crude birth rate (CBR), general fertility rate (GFR), child-woman ratio (CWR), Age specific Fertility rate (ASFR), total fertility rate (TFR), gross reproduction rate (GRR), and net reproduction rate (NRR).	2	
	8	Mortality -Meaning; Sources of mortality Data, Factors affecting mortality	2	
	9	Basic measures of mortality: Crude death rate (CDR), Age specific death rate (ASDR), infant mortality rate (IMR), crude mortality rate (CMR), maternal mortality ratio (MMR), Neonatal mortality rate (NMR), standardised death rate (SDR) and Life tables	2	
	10	Nuptiality- Meaning; Concepts- age at marriage, Synthetic and decadal synthetic cohort methods- Mean age at widowhood and divorce- Trends in age at marriage	2	
	11	Migration: General terms and concepts, types of migration, factors affecting migration	3	
	12	Urbanization: concept and measurement, Recent trends in urban population.	3	
<b>III</b>	<b>Age and Sex Composition of population</b>		<b>10</b>	<b>15</b>
	13	Age pyramids: types, concepts of stationary, stable and quasi - stationary population	2	
	14	Patterns of sex and age structure in developed and developing countries	2	
	15	Age and sex structure in India	2	
	16	Benefits and issues associated with Demographic dividend	2	
	17	Ageing of population	2	
<b>IV</b>	<b>Population policy in India</b>		<b>10</b>	<b>15</b>
	18	History of Family planning in India	2	
	19	Family Planning Programme– Organisational structure, approaches to family planning programme implementation, family planning methods and achievements	3	
	20	The child survival and safe motherhood (CSSM) Programme	2	

	21	Reproductive and child health programme (RCH	1	
	22	National Population Policy 2000	2	
<b>V</b>	<b>Open Ended Module</b>		<b>12</b>	
	1	construct and interpret life tables based upon the latest population data		
	2	Conduct a ward level population survey to identify the age and sex composition of particular locality		
	3	Student-led seminars on key global demographic trends		
	4	Debate on population growth and sustainable development.		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, is only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>BASIC METHODS FOR ECONOMIC RESEARCH</b>				
Type of Course	<b>Elective</b>				
Semester	VI				
Academic Level	300 - 399				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Economics course of 200 – 299 level				
Course Summary	This course seeks basic information about research and its ideas, literature, formation, analysis, interpretation, and presentation.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Understand the historical and philosophical ideas of social research.	U	C	Instructor-created exams / Quiz
CO2	Identification of a research problem and analysis of its cause-and-effect relationship.	An	P	Practical Assignment
CO3	To apply scientific Methods in research.	Ap	F	Seminar Presentation / Group Discussion
CO4	To analyse and interpret data with appropriate tools	Ap	C	Instructor-created exams / Home Assignments
CO5	Create new research tools, concepts, and theories and apply to present world situation.	E	M	Viva
CO6				

\* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C)  
 # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)

**DETAILED SYLLABUS:**

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Fundamentals of Research</b>		<b>11</b>	<b>15</b>
	1	Research- Meaning, Objectives, Importance, characteristics of good research	1	
	2	The relation between theory and research	1	
	3	Research methods v/s Methodology	1	
	4	Types of research– Descriptive v/s Analytical, Applied	4	

		v/s Fundamental, Quantitative v/s Qualitative, Conceptual v/s Empirical		
	5	Scientific and Social research	1	
	6	Special features of social research	1	
	7	Different approaches in social research.	1	
	8	The importance of surveying existing literature in economic research.	1	
<b>II</b>	<b>Research Design</b>		<b>13</b>	<b>20</b>
	9	Research Formulation – Identifying, defining and formulating the research problem	2	
	10	Importance of literature review in defining a problem - Identifying research gap - Development of working hypothesis	4	
	11	Research design – Basic Principles- Need of research design — Features of good research design – Components of Research Design	3	
	12	Methods of Research Design- Exploratory, diagnostic and experimental studies- Deductive and inductive method- Static and dynamic method- Historical and dialectical method- Case study method	3	
	13	Interdisciplinary research.	1	
<b>III</b>	<b>Sources and Collection of Data</b>		<b>9</b>	<b>13</b>
	14	Execution of the research - Observation and Collection of data	1	
	15	Methods of data collection – Primary data and Secondary data	1	
	16	Primary Data - Meaning, sources, merits and demerits, collection of Data - survey method, observation method, Interview method, questionnaires, schedules	5	
	17	Secondary data – Meaning, sources, merits and demerits	1	
	18	Concepts of Universe, Population and sample.	1	
<b>IV</b>	<b>Analysis of Data and Presentation</b>		<b>15</b>	<b>22</b>
	19	Data preparation and preliminary analysis - editing, coding, data entry, exploring, displaying.	5	
	20	Examining data - frequency tables, bar charts, pie charts, histograms, use of percentages	4	
	21	Reporting and report writing	1	
	22	Components – prefatory items, introduction, methodology, findings, conclusions, appendices, bibliography, referencing and footnotes.	5	
<b>V</b>	<b>Open Ended Module</b>		<b>12</b>	
	1	Application of statistical tools in economic research		
	2	Develop and present a comprehensive economic research paper.		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-

ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>INVESTMENT ANALYSIS AND PORTFOLIO MANAGEMENT</b>				
Type of Course	<b>Elective</b>				
Semester	VI				
Academic Level	300 - 399				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Economics course of 200 – 299 level				
Course Summary	The course equips students with theoretical and practical insights into investment decision-making, portfolio construction, valuation of securities, and financial market functioning.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Understand the objectives of investment decisions and functioning of financial markets.	U	C	Instructor-created exams / Quiz
CO2	Analyze fixed income securities, market efficiency, and valuation techniques.	An	P	Practical Assignment
CO3	Apply financial analysis, ratios, and portfolio theories in investment decisions.	Ap	F	Seminar Presentation / Group Discussion
CO4	Evaluate risk-return trade-offs using derivative valuation and portfolio management strategies.	E	C	Instructor-created exams / Home Assignments
CO5	Create effective investment strategies and assess portfolio performance in real-world contexts.	C	M	Viva
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Introduction to Investment &amp; Financial Markets</b>		<b>12</b>	<b>18</b>
	1	Objectives of Investment Decisions – Nature, goals, constraints.	2	
	2	Types of Investors – Individual & institutional.	2	
	3	Goals of Investors – Risk-return trade-off.	2	
	4	Financial Markets – Primary & secondary markets.	2	
	5	Trading in Secondary Markets – Mechanisms & participants.	2	
	6	Money Market Instruments – Repos & reverse repos.	2	
<b>II</b>	<b>Fixed Income Securities &amp; Market Efficiency</b>		<b>14</b>	<b>20</b>
	7	Bond Market – Instruments & participants.	2	
	8	Common Stocks – Features & role in investments.	1	
	9	Time Value of Money – Simple & compound interest, real vs nominal rates.	2	
	10	Bond Pricing Fundamentals.	1	
	11	Bond Yields – YTM, current yield, holding period return.	2	
	12	Duration Measures – Macaulay & modified duration.	2	
	13	Market Efficiency – Concept & forms of EMH.	2	
<b>III</b>	<b>Financial Analysis, Valuation &amp; Portfolio Theory</b>		<b>14</b>	<b>20</b>
	15	Analysis of Financial Statements – Basics.	2	
	16	Financial Ratios – Return, operating & profitability ratios.	3	
	17	Valuation of Common Stocks.	2	
	18	Technical Analysis – Tools & applications.	2	
	19	Modern Portfolio Theory – Diversification & risk-return framework.	3	
	20	CAPM, Multifactor Models & Arbitrage Pricing Theory.	2	
<b>IV</b>	<b>Derivatives &amp; Investment Management</b>		<b>8</b>	<b>12</b>
	21	Valuation of Derivatives – Forwards, futures, options, Black-Scholes.	4	
	22	Investment Management – Mutual funds, active vs passive strategies, NAV, costs & performance assessment (Sharpe, Treynor, Jensen's alpha).	4	
<b>V</b>	<b>Open Ended Module</b>		<b>12</b>	
		Portfolio tracking using real-time stock market data.		
		Case studies on mutual funds, ETFs, and hedge funds.		
		Empirical studies on investor behavior or stock market anomalies.		
		Group discussions on emerging trends in Indian capital markets.		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed

modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>TECHNICAL ANALYSIS</b>				
Type of Course	<b>Elective</b>				
Semester	VI				
Academic Level	300 - 399				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Economics course of 200 – 299 level				
Course Summary	This course introduces students to Technical Analysis (TA) — a method of evaluating securities by analyzing market-generated data such as prices, volume, and patterns.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Understand the basic principles of technical analysis and candlestick patterns.	U	C	Instructor-created exams / Quiz
CO2	Analyze chart patterns, support & resistance, Dow and Elliot Wave theories.	An	P	Practical Assignment
CO3	Apply technical indicators and oscillators for market prediction and trading signals.	Ap	F	Seminar Presentation / Group Discussion
CO4	Evaluate trading strategies and risk management techniques in different market conditions.	E	C	Instructor-created exams / Home Assignments
CO5	Create practical trading models using multiple indicators and apply them to real-time market scenarios.	C	M	Viva
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Introduction to Technical Analysis &amp; Charting</b>		<b>12</b>	<b>18</b>
	1	What is Technical Analysis? Basic assumptions – Price discounts everything, non-random movements.	2	
	2	Strengths and Weaknesses of Technical Analysis – Importance and limitations.	2	
	3	Candle Charts – Basics of candlestick charting.	2	
	4	Single Candle Patterns – Hammer, Hanging Man, Shooting Star, Inverted Hammer	2	
	5	Two Candle Patterns – Bullish/Bearish Engulfing, Piercing, Harami patterns.	2	
	6	Three Candle Patterns – Morning Star, Evening Star, Doji.	2	
<b>II</b>	<b>Patterns &amp; Market Signals</b>		<b>14</b>	<b>20</b>
	7	Support and Resistance – Concepts, zones, importance, role reversal.	2	
	8	Head and Shoulders – Top reversal, inverted, and bottom formation.	2	
	9	Double Top & Bottom – Identification and trading implications.	2	
	10	Rounded Top & Bottom – Continuation and reversal signals.	2	
	11	Gap Theory – Common, Breakaway, Runaway, Exhaustion, Island cluster gaps.	2	
	12	Dow Theory – Principles, significance, and limitations.	2	
	13	Elliot Wave Theory – Fundamental concepts and applications.	2	
<b>III</b>	<b>Indicators &amp; Oscillators</b>		<b>14</b>	<b>20</b>
	14	Technical Indicators – Role, types, and application tips.	2	
	15	Moving Averages – SMA, EMA, crossovers, settings, and signals.	2	
	16	Relative Strength Index (RSI) – Momentum, divergence, overbought/oversold.	2	
	17	Stochastic Oscillator, William %R – Uses and limitations.	2	
	18	MACD – Calculation, benefits, and trading signals.	2	
	19	Other Indicators – Money Flow Index, Bollinger Bands.	2	
	20	Using Multiple Indicators – Composite techniques, bull & bear market toolkits.	2	
<b>IV</b>	<b>Trading Strategies &amp; Risk Management</b>		<b>8</b>	<b>12</b>
	21	Trading Strategies – Day trading, momentum trading; advantages and risks.	4	
	22	Trading Psychology & Risk Management – Stop loss, reward-risk ratio, trailing stop loss, booking profits, discipline, golden rules, do's & don'ts.	4	
<b>V</b>	<b>Open Ended Module</b>		<b>12</b>	
		Live chart reading & candlestick pattern identification.		

	Simulation of trading strategies (day trading, momentum trading).	
	Back-testing of technical indicators using historical stock data.	
	Case studies on market crashes and recoveries using TA tools.	

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Programme	B.A. Economics Honours				
Course Title	<b>ECONOMICS OF EDUCATION</b>				
Type of Course	<b>Elective</b>				
Semester	VIII				
Academic Level	400 - 499				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Basic Economics Courses of 200 – 299 level				
Course Summary	This course provides an overview of economics of education to lay out the evidence as clearly as possible, note agreements, disagreements, and unresolved points in literature, and to help students develop the tools necessary to draw their own conclusions.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO 1	To explore the interrelationship between economics and education in the modern society	U	F	Instructor-created exams / Quiz
CO 2	To examine the demand, supply, costs and benefits of education within the purview of economic development	Ap	P	Practical Assignment / Observation of Practical Skills
CO 3	To understand the economic imperative of manpower planning and human resource development for a country	U	P	Seminar Presentation / Group Discussion
CO 4	To get an overview of the education scenario of both India and Kerala	Ap	P	Instructor-created exams / Home Assignments
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Education, Economics and the Modern Society</b>		<b>10</b>	<b>14</b>
	1	Education in the modern world	2	
	2	Socio-economic significance of education	2	
	3	Economists' perception of education	2	
	4	Education as a public/merit good	2	
	5	Economics of education: The subject matter, framework and significance	2	
<b>II</b>	<b>Education and Economic Development</b>		<b>12</b>	<b>18</b>
	6	Education as the prime mover of modern society	2	
	7	Education and economic growth	2	
	8	Indicators of economic and educational development	2	
	9	Stages of economic and educational development	2	
	10	Demand for education and its major determinants	2	
	11	Supply of Education and its major determinants	2	
<b>III</b>	<b>Cost and Benefits of Education</b>		<b>12</b>	<b>18</b>
	12	Education as an investment – Private return and social return	2	
	13	Costs and benefits of education – Direct and indirect social benefits – Cost-benefit analysis of education	4	
	14	Rate of return analysis	2	
	15	Input-output analysis	2	
	16	Wastage and stagnation in education	1	
	17	Educational budgets	1	
<b>IV</b>	<b>Human Capital and Manpower Planning</b>		<b>14</b>	<b>20</b>
	18	Economic imperative of human capital	2	
	19	Human resource development – Process of human resource development – Indicators of human resource development –	5	
	20	Linking education with the economy	2	
	21	Educational planning	2	
	22	Manpower planning – Features and techniques of manpower planning and forecasting	3	
<b>V</b>	<b>Open Ended Module</b>		<b>12</b>	
		<b>Discussion</b> based on the primary, secondary, higher secondary and higher education scenario of India and Kerala		
		<b>Practical Assignments</b> on Initiatives for educational development		
		<b>Seminar</b> on the new education policy and its impacts on the national and regional economy		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, is only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>SECTORAL CONTRIBUTIONS IN INDIAN ECONOMY</b>				
Type of Course	<b>Minor</b>				
Semester	I				
Academic Level	100 - 199				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Basic Economics course of 0-99 level				
Course Summary	This course explores important sectors in an economy, their trends, and compositions				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	To provide students with an in-depth understanding of the primary, secondary, and tertiary sectors in the Indian economy.	U	C	Instructor-created exams / Quiz
CO2	To analyze the historical evolution and status of each sector and their contributions to the GDP.	An	P	Practical Assignment / Observation of Practical Skills
CO3	To examine the employment generation and income distribution in each sector.	E	P	Seminar Presentation / Group Discussion
CO4	To evaluate the challenges and opportunities for each sector in the Indian economy.	Ap	F	Instructor-created exams / Home Assignments
CO5	To encourage critical thinking on emerging sectors and open-ended discussions on their potential contributions.	Ap	F	Writing assignments
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

**DETAILED SYLLABUS:**

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Introduction to different sectors</b>		<b>8</b>	<b>12</b>
	1	Overview of the primary, secondary, and tertiary sectors	3	
	2	Historical perspective of the sectoral composition in the Indian economy	3	
	3	Importance of analysing sectoral contributions for	2	

		economic planning		
<b>II</b>	<b>Performance of Primary Sector</b>		<b>15</b>	<b>22</b>
	4	Indian agriculture- Role nature and cropping pattern	2	
	5	Trend in agriculture production and productivity	1	
	6	Land reforms	2	
	7	Agriculture input and green revolution	2	
	8	Agriculture marketing and finance	2	
	9	Agriculture price policy	2	
	10	Agriculture subsidy and food security in India	2	
	11	Problems faced by Indian agriculture	2	
<b>III</b>	<b>Performance of the Industrial sector</b>		<b>15</b>	<b>22</b>
	12	Performance of Industries during Plan period	2	
	13	Some basic industries in India- iron and steel, jute, textile, sugar, cement	2	
	14	Role of small scale and cottage industries- Problems faced by cottage industries	3	
	15	Recent industrial policies	2	
	16	Public sector undertakings – role, performance, and problems	2	
	17	Privatisation and disinvestment programmes in India	2	
	18	Problems faced by Indian industries	2	
<b>IV</b>	<b>Performance of the Service sector</b>		<b>10</b>	<b>14</b>
	19	Growth and contribution of service sector in India	3	
	20	Service sector and employment	2	
	21	Information and communication technology	2	
	22	Foreign trade in services	3	
<b>V</b>	<b>Open Ended Module</b>		<b>12</b>	
	1	<b>Discussion</b> based on the new and emerging sectors in the Indian economy		
	2	<b>Assignments</b> on role of different sectors in Kerala economy		
	3	<b>Seminar</b> on contribution of different sectors to National income in the last two years		
	4	Critically evaluate the performance of MSMEs		
	5	Debate on sustainability of service Led Growth		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

<b>V</b>	<b>Open Ended Module</b>		<b>12</b>	
		Discussion How SEZs contribute to job creation and technological advancements.		
		Practical Assignments Assess the socio-economic impact of an existing SEZ on the surrounding community.		
		Seminar Identify and analyse the challenges faced by SEZs in various regions.		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Program	B.A. Economics Honours				
Course Title	<b>KNOWLEDGE ECONOMY IN INDIA</b>				
Type of Course	<b>Minor</b>				
Semester	III				
Academic Level	200-299				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Economics Course of 100-199 level				
Course Summary	The course emphasizes the impact of knowledge economy on economic development, by analyzing the historical evolution of knowledge economy in India, importance of human capital in knowledge economy, and the role of innovation in driving the knowledge economy.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO 1	Understand the concept and characteristics of the knowledge economy.	U	C	Instructor-created exams / Quiz
CO 2	Analyze the impact of brain drain and brain gain on India's knowledge economy.	An	P	Assignment / Seminar Presentation
CO 3	Evaluate the importance of intellectual property rights in fostering innovation.	E	P	Seminar Presentation / Group Discussion
CO 4	Apply knowledge economy concepts to real-world scenarios.	Ap	P	Practical Assignments / Case Studies
CO 5	Demonstrate critical thinking and problem-solving skills by applying the acquired knowledge to address complex economic challenges in the contemporary world.	Ap	P	Writing assignments/ Survey / Seminar/ presentation/ Group Discussion
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Introduction to the Knowledge Economy</b>		<b>10</b>	<b>15</b>
	1	Definition and characteristics of the knowledge economy	1	
	2	Evolution of the knowledge economy	2	
	3	Distinction between traditional and knowledge-based economies	2	
	4	Global trends and drivers of the knowledge economy	3	
	5	The role of knowledge in economic development.	2	
<b>II</b>	<b>The Knowledge Economy in India</b>		<b>18</b>	<b>26</b>
	6	Emergence and growth of the knowledge economy in India	4	
	7	Key sectors of the Indian knowledge economy: IT, IT-enabled services, biotechnology, pharmaceuticals, education, R&D	4	
	8	The role of government in promoting the knowledge economy	2	
	9	Challenges and opportunities for the Indian knowledge economy	2	
	10	Impact of the knowledge economy on employment patterns and social dynamics in India.	3	
	11	India's position in the global knowledge economy and its competitiveness.	3	
<b>III</b>	<b>Human Capital and the Knowledge Economy</b>		<b>8</b>	<b>12</b>
	12	The importance of human capital for the knowledge economy	2	
	13	Education and skill development in India	2	
	14	Brain drains and brain gain in the Indian context	2	
	15	Strategies for developing a skilled workforce for the knowledge economy	2	
	16	Policies and initiatives promoting education and human capital development in India.	2	
<b>IV</b>	<b>Innovation and the Knowledge Economy</b>		<b>12</b>	<b>17</b>
	17	Definition of Innovation and Knowledge	2	
	18	The role of innovation in 5 key capabilities or 'E's: Enablers, Education, Engagement, Entrepreneurship and Empowerment, Environment.	2	
	19	The Indian innovation ecosystem: startups, incubators, accelerators	2	
	20	Intellectual property rights and innovation	2	
	21	The role of innovation in driving the knowledge economy	1	
	22	Challenges and opportunities related to IPR in India.	1	
<b>V</b>	<b>Open ended module</b>		<b>12</b>	
	1	Seminar on Building a Sustainable Knowledge Economy in India: Balancing Growth with Equity		
	2	Discussion about the Future of the Knowledge Economy in India		
	3	Practical Assignments Analyse the impact of India's National		

		Skill Development Mission and propose improvements to enhance its effectiveness in training and upskilling the workforce for the knowledge economy.		
	4	Critically evaluate the Inequality and inclusivity in the knowledge economy.		
	5	Organize a debate on Emerging trends in the knowledge economy		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Programme	B.A. Economics Honours				
Course Title	<b>MICROECONOMICS FOUNDATIONS</b>				
Type of Course	<b>Minor</b>				
Semester	I				
Academic Level	100 – 199				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	4	4	-	-	60
Pre-requisites	Basic Economics Course of 0 – 99 level				
Course Summary	This course explores important concepts, basic theories and models, various market structures and other fundamental aspects of microeconomics.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO 1	Understand the basic concepts of microeconomics	U	C	Instructor-created exams / Quiz
CO 2	Apply the basic concepts of microeconomics to real-world scenario	Ap	P	Practical Assignment / Observation of Practical Skills
CO 3	Analyse market equilibrium and its applicability in the real world	An	P	Seminar Presentation / Group Discussion
CO 4	Evaluate consumer choices and preferences	E	P	Instructor-created exams / Home Assignments
CO 5	Analyse different market structures in connection with existing market conditions for different products in the world	An	F	Writing assignments
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Supply and Demand</b>		<b>10</b>	<b>15</b>
	1	Demand: The Demand Curve, The Demand Function, Summing Demand Curves	2	
	2	Supply: The Supply Curve, The Supply Function, Summing Supply Curves	2	
	3	Market Equilibrium: Using a Graph to Determine the Equilibrium, Using Math to Determine the Equilibrium, Forces That Drive the Market to Equilibrium	2	
	4	Shocking the Equilibrium: Effects of a Shift in the Demand Curve, Effects of a Shift in the Supply Curve	2	
	5	Equilibrium Effects of Government Interventions: Policies That Shift Supply Curves, Policies That Cause Demand to Differ from Supply, Why Supply Need Not Equal Demand	2	
<b>II</b>	<b>Consumer Choice</b>		<b>10</b>	<b>15</b>
	6	Preferences: Properties of Consumer Preferences, Preference Maps	2	
	7	Utility: Utility Function, Ordinal Preferences, Utility and Indifference Curves, Utility and Marginal Utility, Utility and Marginal Rates of Substitution	4	
	8	Budget Constraint: Slope of the Budget Constraint, Effect of a Change in Price on the Opportunity Set, Effect of a Change in Income on the Opportunity Set	2	
	9	Constrained Consumer Choice: The Consumer's Optimal Bundle, Optimal Bundles on Convex Sections of Indifference Curves, Buying Where More Is Better	2	
<b>III</b>	<b>Production and Cost</b>		<b>15</b>	<b>22</b>
	10	The Ownership and Management of Firms: Private, Public, and Nonprofit Firms, The Ownership of For-Profit Firms, The Management of Firms, What Owners Want	2	
	11	Production: Production Functions, Time and the Variability of Inputs	1	
	12	Short-Run Production: One Variable and One Fixed Input: Total Product, Marginal Product of Labor, Average Product of Labor, Graphing the Product Curves, Law of Diminishing Marginal Returns	2	
	13	Long-Run Production: Two Variable Inputs: Isoquants, Substituting Inputs	2	
	14	Returns to Scale: Constant, Increasing, and Decreasing Returns to Scale, Varying Returns to Scale	2	
	15	The Nature of Costs: Opportunity Costs, Costs of Durable Inputs, Sunk Costs	2	
	16	Short-Run Costs: Short-Run Cost Measures, Short-Run Cost Curves, Production Functions and the Shape of Cost Curves, Effects of Taxes on Costs,	2	
	17	Long-Run Costs: Input Choice, How Long-Run Cost Varies	2	

		with Output, The Shape of Long-Run Cost Curves		
<b>IV</b>	<b>Market Structure</b>		<b>13</b>	<b>18</b>
	18	Perfect Competition: Price Taking, Why the Firm's Demand Curve Is Horizontal, Derivation of a Competitive Firm's Demand Curve, Profit Maximization, Short-Run Competitive Profit Maximization, Long-Run Competitive Profit Maximization	4	
	19	Monopoly: Monopoly Profit Maximization, Market Power,	2	
	20	Welfare Effects of Monopoly	1	
	21	Oligopoly: Cartels, Noncooperative Oligopoly, The Cournot Equilibrium and the Number of Firms, Stackelberg Graphical Model, Comparison of Collusive, Cournot, Stackelberg, and Competitive Equilibria	4	
	22	Monopolistic Competition: Monopolistically Competitive Equilibrium, Fixed Costs and the Number of Firms	2	
<b>V</b>	<b>Open ended module</b>		<b>12</b>	
		<b>Discussion</b> based on different market structures prevailing in the world		
		<b>Case study</b> of decision making by firms		
		<b>Seminar</b> on the influence of economic policies on market transactions		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Internal assessments (30 marks) are split between the open-ended module (10 marks) and the fixed modules (20 marks). The final exam, however, covers only the 22 units from the fixed modules. The 70 marks shown in the last column, distributed over the first four modules, is only for the external examination.

## DETAILED SYLLABUS:

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>The Macroeconomic Perspective</b>		<b>12</b>	<b>18</b>
	1	Assessing the Economy's Performance: Gross Domestic Product, A Monetary Measure, Avoiding Multiple Counting, GDP Excludes Nonproduction Transactions, Two Ways of Looking at GDP: Spending and Income	3	
	2	The Business Cycle: Phases of the Business Cycle, Causes, Cyclical Impact: Durables and Nondurables	2	
	3	Unemployment: Measurement of Unemployment, Types of Unemployment, Definition of Full Employment, Economic Cost of Unemployment, Noneconomic Costs	2	
	4	Inflation: Meaning of Inflation, Measurement of Inflation, Facts of Inflation, Types of Inflation, Complexities, Core Inflation	3	
	5	Redistribution Effects of Inflation: Nominal and Real Income, Anticipations, Who Is Hurt by Inflation? Who Is Unaffected or Helped by Inflation? Anticipated Inflation, Negative Nominal Interest Rates, Other Redistribution Issues	2	
<b>II</b>	<b>Basic Macroeconomic Relationships</b>		<b>12</b>	<b>18</b>
	6	The Income-Consumption and Income-Saving Relationships: The Consumption Schedule, The Saving Schedule, Average and Marginal Propensities	3	
	7	Non-income Determinants of Consumption and Saving	2	
	8	The Interest-Rate-Investment Relationship: Expected Rate of Return, The Real Interest Rate, Investment Demand Curve	3	
	9	Shifts of the Investment Demand Curve: Instability of Investment	2	
	10	The Multiplier Effect: Rationale, The Multiplier and the Marginal Propensities, How Large Is the Actual Multiplier Effect?	2	
<b>III</b>	<b>Money, Banking, and Financial Institutions</b>		<b>11</b>	<b>16</b>
	11	The Functions of Money	1	
	12	The Components of the Money Supply: Money Definitions $M_0$ , $M_1$ , $M_2$ , $M_3$	2	
	13	What "Backs" the Money Supply? Money as Debt, Value of Money, Money and Prices, Stabilizing Money's Purchasing Power	2	
	14	The Central Bank: RBI and the banking system, Functions, Responsibilities and Independence of RBI	2	
	15	Commercial Banks: Structure of commercial banks in India, Functions of commercial banks	2	
	16	Monetary policy: Tools, Monetary Policy Committee, Inflation Targeting	2	
<b>IV</b>	<b>Financial Economics</b>		<b>13</b>	<b>18</b>
	17	Financial Investment	1	
	18	Present Value: Compound Interest, The Present Value Model, Applications	3	

	19	Calculating Investment Returns: Percentage Rates of Return, The Inverse Relationship between Asset Prices and Rates of Return	2	
	20	Arbitrage	2	
	21	Risk: Diversification	2	
	22	Comparing Risky Investments: Average Expected Rate of Return, Beta, Relationship of Risk and Average Expected Rates of Return, The Risk Free Rate of Return	3	
<b>V</b>	<b>Open ended module</b>		<b>12</b>	
		<b>Discussion</b> based on inflation, unemployment and GDP prevailing in India		
		<b>Debate</b> on monetary policy by RBI		
		<b>Seminar</b> on the influence of transactions in financial assets on economy		

**Note:** The course is divided into five modules, with four modules together having total 22 fixed units and one open-ended module with a variable number of units. There are total 48 instructional hours for the fixed modules and 12 hours for the open-ended one. Programme	B.A. Economics Honours				
Course Title	<b>SECURITY TRADING PRACTICES</b>				
Type of Course	MDC				
Semester	I				
Academic Level	100 – 199				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	3	3	-	-	45
Pre-requisites	Basic course on stock market of level 0 - 99				
Course Summary	This course is designed to provide a theoretical and practical background in the field of investments.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO 1	Students will acquire a conceptual foundation in the field of investments.	U	C	Instructor-created exams / Quiz
CO 2	Learners will gain skills in designing and managing both bond and equity portfolios in real-world scenarios.	Ap	P	Practical Assignment using paper trading app
CO 3	Students will be able to value various financial instruments, including equity and debt securities	An	P	Seminar Presentation / Group Discussion
CO 4	Evaluate the characteristics of various avenues of investment.	E	M	Instructor-created exams / Home Assignments
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

**DETAILED SYLLABUS:**

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Investment Environment, Markets and Instruments</b>		<b>8</b>	<b>11</b>
	1	Financial Market—Primary and Secondary market	1	
	2	instruments of secondary market;	1	
	3	Major Agencies of Secondary market: NSE, BSE, CDSL, NSDL, SEBI	2	
	4	Different types of trading—overview of derivative market, futures and options, Major indices of BSE and NSE.	2	
	5	Different trader in the secondary market—FIIs, DIIs, retailers	2	
<b>II</b>	<b>Equity Selection</b>		<b>8</b>	<b>11</b>

	6	<b>The Fundamental Analysis:</b> Meaning and importance	1	
	7	Important ratios; Price-to-Earnings (P/E) ratio-Price-to-Book (P/B) ratio -Dividend Yield, Earnings Per Share (EPS), ROCE and ROE, D/EBITDA, EV/ EBITDA	2	
	8	Technical Analysis: Meaning and importance	2	
	9	important methods—chart, candle sticks-- important indicators namely, Support, resistance, RSI, Moving Average, volume, price channel, VIX –	3	
	<b>Portfolio Creation</b>		<b>8</b>	<b>11</b>
<b>III</b>	10	Theories of portfolio creation: Capital Asset Pricing Model (CAPM), Arbitrage Pricing Theory (APT), Markowitz portfolio theory, Behavioural Portfolio Theory	4	
	11	Different types of Brokers-- Process of opening a demat account with a discount broker--	2	
	12	Maintain trading account details— P& L statement-- capital gain – capital gain tax -- details that are to be included in the income tax return.	2	
	<b>Trade Management</b>		<b>12</b>	<b>17</b>
<b>IV</b>	13	Different Sectors in secondary market eg Banking, Auto, pharma, IT, infrastructure, FMCG etc.	2

Programme	B.A. Economics Honours				
Course Title	<b>FINANCIAL LITERACY AND PERSONAL FINANCE</b>				
Type of Course	<b>Value Added Course</b>				
Semester	III				
Academic Level	100 – 199				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	3	3	-	-	45
Pre-requisites	Basic course on Economics of 0 – 99 level				
Course Summary	This course provokes the students on the importance of personal financial planning and imparts basic financial literacy principles, with the intention of building in them capability to manage personal finances optimally in various stages of life.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO1	Understand the basic principles of personal finance and its applications.	U	C	Instructor- created exams / Quiz
CO2	Develop and practice the skill of planning and managing personal finances efficiently.	Ap	P	Practical Assignment / Creating a sample personal financial plan
CO3	Help the students master the concept of time value of money and provide them with necessary skills to beat inflation and maintain the purchasing power of money.	U	C	Seminar Presentation / Group Discussion
CO4	Understand and apply structured personal financial techniques in real life situations.	Ap	P	Instructor- created exams / Home Assignments
CO5	Provide the students with an understanding of various financial products like bank accounts, insurance products and equities and enable them	U	F	Writing assignments

	to acquire a diversified portfolio of financial products in real life.			
CO6	Demonstrate critical thinking and problem-solving skills by applying the acquired knowledge to evaluate complex financial products.	Ap	P	Viva Voce
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

**DETAILED SYLLABUS:**

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Personal Financial Planning/Financial Literacy</b>		<b>10</b>	<b>14</b>
	<b>Basics of financial planning</b>			
	1	Meaning of financial planning and the importance of financial planning.	1	
	2	Risk vs return (inflation risk, market risk and exchange risk).	1

Programme	B.A. Economics Honours				
Course Title	<b>BIG DATA ANALYSIS IN ECONOMICS</b>				
Type of Course	<b>SEC</b>				
Semester	V				
Academic Level	100 - 199				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	3	3	-	-	45
Pre-requisites	Basic Economics Course of 0 – 99 level				
Course Summary	The students will be able to identify the role of big data in economic theory, using big data for prediction purpose and make capable for helping private and public policies				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO 1	Understand the characteristics and sources of data	U	F	Instructor-created exams / Quiz
CO 2	Analyze different Motivating applications	Ap	C	Practical Assignment / Observation of Practical Skills
CO 3	Evaluate Architectures for big data collection	E	P	Seminar Presentation / Group Discussion
CO 4	Apply Big Data for Prediction and Public Policy	Ap	P	Instructor-created exams / Home Assignments
CO 5	Create programs for big data analytics	C	M	Running programs
CO 6	Demonstrate critical thinking and problem-solving skills by applying the acquired knowledge to address complex economic challenges in the contemporary world.	Ap	M	Viva Voce

\* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C)  
 # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)

**DETAILED SYLLABUS:**

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>The Role of Economic Theory in big data</b>		<b>8</b>	<b>10</b>
	1	Characteristics of Big data.	2	
	2	The need for Analytics and Understanding Analytics: Impact of analytics on business; Being analytically competitive; Models and algorithms in Analytics; The Analytics Methodology	2	

	3	Advantages of big data in the economic research and policymaking	2	
	4	Challenges and risks in big data	2	
<b>II</b>	<b>Major economic data sources</b>		<b>9</b>	<b>12</b>
	5	Sources of big data - National and International	3	
	6	Motivating applications: web scraping, social media, Google.	3	
	7	Real time data (Social media and the labor market)	3	
<b>III</b>	<b>Using Big Data to Advanced Economic Theory</b>		<b>9</b>	<b>14</b>
	8	Tool and Tech Landscape: A review of technology used in data storage, data processing, and data science; Popular tools used in Data Science and when to use each	2	
	9	Using Big Data for Prediction and Public Policy	2	
	10	Architectures for big data collection, analysis, and storage.	1	
	11	Using micro data to answer macroeconomic questions	2	
	12	Finance and high frequency trading	2	
<b>IV</b>	<b>Machine learning methods</b>		<b>10</b>	<b>14</b>
	13	Linear Regression Models and their applications	1	
	14	Logistics Regression Models and their applications	2	
	15	Time Series Forecasting	2	
	16	k-nearest-neighbors, classification and regression trees, random forests.	1	
	17	An overview of neural networks and deep learning: Images, sounds, text, as sources of information.	1	
	18	Text mining: natural language processing, latent Dirichlet allocation, sentiment analysis.	1	
	19	Big Data Analytics with R.	2	
<b>V</b>	<b>Open Ended Module</b>		<b>9</b>	
		NFHS data extraction techniques		
		NSSO data extraction techniques		

**Note:** The course is divided into five modules, with four modules together having total 19 fixed units and one open-ended module with a variable number of units. There are total 36 instructional hours for the fixed modules and 9 hours for the open-ended one. Internal assessments (25 marks) are split between the open-ended module (5 marks) and the fixed modules (20 marks). The final exam, however, covers only the 19 units from the fixed modules. The 50 marks shown in the last column, distributed over the first four modules, are only for the external examination.

Programme	B.A. Economics Honours				
Course Title	<b>ECONOMIC RESEARCH WITH R</b>				
Type of Course	<b>SEC</b>				
Semester	VI				
Academic Level	100 – 199				
Course Details	Credit	Lecture per week	Tutorial per week	Practical per week	Total Hours
	3	3	-	-	45
Pre-requisites	Basic Economics, Basic Mathematics and Basic Statistics courses of 0 – 99 level				
Course Summary	This course provides an introductory exposure to Economics research using ‘R’ with imparting basic programming skills in the various functions in R, which enable the students to apply various functions learned in Economic Research.				

**COURSE OUTCOMES (CO):**

CO	CO Statement	Cognitive Level*	Knowledge Category#	Evaluation Tools used
CO 1	Understand basic programming in R.	U	C	Instructor-created exams / Quiz
CO 2	Analyse various loops and use them appropriately	Ap	P	Practical Assignment /Case Studies in the Indian context
CO 3	Evaluate various data analysis tools and employ them appropriately.	U	P	Seminar Presentation / Group Discussion
CO 4	Apply various functions/models in Economic Research	Ap	C	Instructor-created exams / Home Assignments/Cases in the Indian context
CO 5	Design various models and use it in the data analysis.	E	P	Writing assignments
CO 6	Demonstrate problem-solving skills by applying the acquired knowledge in R software to address complex economic challenges in the contemporary world.	Ap	P	Viva Voce
* - Remember (R), Understand (U), Apply (Ap), Analyse (An), Evaluate (E), Create (C) # - Factual Knowledge(F) Conceptual Knowledge (C) Procedural Knowledge (P) Metacognitive Knowledge (M)				

Module	Unit	Content	Hrs	Marks
<b>I</b>	<b>Introduction to R and R studio.</b>		<b>7</b>	<b>10</b>
	1	Basics of R programming	1	
	2	R Markdown files	2	
	3	Primitive Object Types: Vectors, List	2	
	4	Matrices, Arrays, Factors, Data frames.	2	
<b>II</b>	<b>Loops in R and Functions in R.</b>		<b>6</b>	<b>8</b>
	5	if, else, while and for loops.	2	
	6	apply () class functions	2	
	7	Writing your own function	2	
<b>III</b>	<b>UNIT 3 Data management with Tidyverse</b>		<b>12</b>	<b>17</b>
	8	Importing and exporting data	2	
	9	Introduction to tidyverse and tidy workflow	2	
	11	Data extraction	2	
	12	Data cleaning	1	
	13	Data formatting and wrangling	2	
	14	Creating summary statistics tables	1	
	15	Basic data analysis using tidyverse	2	
<b>IV</b>	<b>UNIT 4 Data Visualisation and Basics of Plotting in R</b>		<b>11</b>	<b>15</b>
	16	Creating plots with base R functions.	1	
	17	Introduction to ggplot. Data visualization using ggplot2	1	
	18	Linear models - Generic functions for extracting model information - Linear (Multiple Regression) Models	3	
	19	The (Model Formula in Straight Line Regression) - Analysis of variance (ANOVA) and ANOVA tables	6	
<b>V</b>	<b>Open Ended Module</b>		<b>9</b>	
	Use Various models learned in the above modules			

**Note:** The course is divided into five modules, with four modules together having total 19 fixed units and one open-ended module with a variable number of units. There are total 36 instructional hours for the fixed modules and 9 hours for the open-ended one. Internal assessments (25 marks) are split between the open-ended module (5 marks) and the fixed modules (20 marks). The final exam, however, covers only the 19 units from the fixed modules. The 50 marks shown in the last column, distributed over the first four modules, are only for the external examination.
