## **Report:**

The methods adopted for eliminating waste generation, mitigation of waste, grading of waste and its scientific way of disposal are known as Green Protocol. The objective of the Green Protocol is to mitigate the generation of waste instead of searching for ways and means to dispose of the waste that we created. Grading of waste at the source of generation is a way of implementation of Green Protocol and As part of the Green Kerala Mission, Sacred Heart College has successfully implemented the Green Protocols for which the College has been graded as a Green Office. This institution was declared as a Green Office with A grade.
